

FBG11B

Industrial automation components

Manufacturer	Sew-Eurodrive
Catalog number	fbg11b
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.04 kgs
Product Type	Keypad Module
Display	5-digit, 7-segment LED
Buttons	6 tactile control buttons
Icons	8 icons
Protection Class	IP20

Description

The FBG11B is a basic keypad module designed by SEW-Eurodrive for efficient operation and diagnostics of MOVITRAC® B and MOVIDRIVE® B inverters. This compact device features a 5-digit, 7-segment LED display, six tactile control buttons, and eight icons, facilitating straightforward parameter setting, process value monitoring, and fault diagnostics directly at the drive. Its IP20 protection rating makes it suitable for clean, enclosed industrial environments. The keypad can be easily plugged onto the inverter during operation, offering flexibility in mounting, even near the motor or within control cabinets. Key functions include displaying process values and status, querying and resetting fault memory, parameter display and setting, data backup and transfer of parameter sets, and manual control of MOVITRAC® B inverters. The FBG11B enhances operational efficiency by providing a user-friendly interface for both SEW-Eurodrive and third-party motors.
