

## MC07A011-5A3-4-00

Industrial automation components

<b>Manufacturer</b>	Sew-Eurodrive
<b>Catalog number</b>	mc07a011-5a3-4-00
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Power Rating</b>	1.1 kW
<b>Voltage Range</b>	380–500 V AC
<b>Output Current</b>	3.1 A
<b>Phase</b>	Three-phase
<b>Frequency</b>	50/60 Hz

### Description

The Sew-Eurodrive MC07A011-5A3-4-00 is a 1.1 kW (1.5 HP) three-phase frequency inverter from the MOVITRAC® 07 series, designed for precise speed control of asynchronous motors in industrial applications. Operating within a voltage range of 380–500 V AC and a frequency of 50/60 Hz, it delivers a continuous output current of 3.1 A. This inverter is engineered to enhance energy efficiency and performance in systems such as conveyor belts, pumps, fans, and packaging machinery. Its compact design facilitates easy integration into existing setups, while its robust construction ensures reliable operation in demanding environments. The MC07A011-5A3-4-00 is an ideal solution for applications requiring variable speed control and torque management, contributing to optimized process control and reduced mechanical stress on connected equipment.
