Manufacturer	Siemens
Catalog number	6ag4141-5bc55-0fa0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Microbox PC
Supply Voltage	24 V DC
Industrial Ethernet Interfaces	3 (2x RJ45, optional 3x RJ45)
Graphics Controller	Onboard HD graphics
USB Ports	4x USB 3.0 (high current)
Mounting Options	DIN rail, wall mounting, portrait mounting

Description

The Siemens 6AG4141-5BC55-0FA0 is a model from the SIMATIC IPC427E series, a compact industrial PC designed for demanding automation tasks. This Microbox PC offers robust performance and versatility for various industrial applications.

Key features include a 24 V DC supply voltage, ensuring compatibility with standard industrial power systems. It is equipped with three industrial Ethernet interfaces (2x RJ45, optional 3x RJ45), facilitating seamless network connectivity.

The device supports high-definition graphics through its onboard graphics controller and provides multiple USB 3.0 ports for peripheral connectivity. Designed for flexible installation, it can be mounted on DIN rails, walls, or in portrait orientation, adapting to diverse industrial environments.

The IPC427E operates without a pre-installed operating system, allowing users to customize the software environment to meet specific application requirements. Its compact design and comprehensive connectivity options make it an ideal choice for applications requiring reliable and adaptable computing solutions in industrial settings.
