Technical specification

Display Size	15 inches
Display Resolution	1024 x 768 pixels
Power Supply	24V DC
Processor	Intel Pentium III processor
Memory	512 MB SDRAM
Storage	1 GB Compact Flash
Operating System	Windows XP SP2 Embedded OS

Description

The Siemens 6AV7844-0AF30 is a model from the SIMATIC PANEL PC 477 series, designed for industrial automation applications. This panel PC features a 15-inch display with a resolution of 1024 x 768 pixels, providing clear and detailed visuals for operator interfaces.

It operates on a 24V DC power supply, ensuring compatibility with standard industrial power systems. The device is equipped with a USB interface for seamless connectivity and expansion. Powered by an Intel Pentium III processor, it offers reliable performance for various automation tasks.

The system includes 512 MB of SDRAM memory, supporting efficient multitasking and operation of complex applications. For storage, it utilizes a 1 GB Compact Flash drive, providing robust and durable data storage suitable for industrial environments.

The operating system pre-installed is Windows XP SP2 Embedded, offering a stable and familiar platform for industrial applications. This panel PC is ideal for use in control panels, machinery interfaces, and other automation systems where a reliable and user-friendly interface is essential.
