Manufacturer	Siemens
Catalog number	6dd2920-0be0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	GTO-MONITORING MODULE
Brand	Siemens
Part Number	6DD2920-0BE0
Application Area	Industrial Automation
Control System	SIMADYN D

Description

The Siemens 6DD2920-0BE0 GTO-MONITORING MODULE is a specialized component designed for the SIMADYN D high-speed control system, primarily used in industrial automation applications requiring precise monitoring and control of gate turn-off (GTO) thyristors.

This module plays a crucial role in ensuring the reliable operation of power converters by providing real-time monitoring of thyristor performance, thereby enhancing system stability and efficiency. Key features of the 6DD2920-0BE0 include its compatibility with the SIMADYN D control platform, robust design suitable for industrial environments, and its ability to interface seamlessly with other components within the system.

Its application areas encompass various industrial sectors where high-speed control and precise power conversion are essential, such as in heavy-duty drive systems and large-scale industrial machinery.

By integrating this module, users can achieve improved system performance, reduced downtime, and extended equipment lifespan.
