

6EP1437-1SL11

Industrial automation components

Manufacturer	Siemens
Catalog number	6ep1437-1sl11
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	3.08 kgs
Voltage	24 V
Frequency	50 - 60 Hz
Signal Type	24
Signal Level	24 V
Relay Specifications	400 VAC

Description

The Siemens 6EP1437-1SL11 is a high-performance power supply module from the SITOP Power 40 series, engineered to provide a stable 24 V DC output for industrial automation systems. Designed for demanding environments, it accepts a three-phase 400 V AC input (with a voltage range of 340–460 V) and delivers a consistent 40 A DC output, ensuring reliable power distribution for PLCs, control panels, and other industrial control systems. The module features a compact design with dimensions of approximately 260 × 180 × 180 mm and a weight of around 7.0 kg, facilitating easy installation and integration into existing setups. Its robust construction and efficient performance make it a suitable choice for applications requiring continuous and dependable power supply.
