## Technical specification

| | |
|---|---|
| **Power Supply** | 24 V DC |
| **Digital Inputs** | 16 inputs |
| **Digital Outputs** | 16 outputs |
| **Analog Inputs** | 8 inputs |
| **Analog Outputs** | 1 output |
| **Interface** | SINEC L2 (RS-485) interface |
| **Memory Capacity** | 16 KB |

## Description

The Siemens 6ES5 095-8MD03 is a compact programmable logic controller (PLC) from the SIMATIC S5 series, specifically designed for industrial automation applications. This model operates on a 24 V DC power supply and features 16 digital inputs and 16 digital outputs, facilitating seamless integration into various automation systems.

Additionally, it includes 8 analog inputs and 1 analog output, enabling precise control and monitoring of analog signals. The controller is equipped with a SINEC L2 (RS-485) interface, allowing efficient communication with other devices in the network.

With a memory capacity of 16 KB, it supports the execution of complex control programs, enhancing the efficiency and reliability of industrial processes. The 6ES5 095-8MD03 is suitable for applications requiring robust and versatile control solutions, such as manufacturing processes, machinery control, and system monitoring.
