Manufacturer	Siemens
Catalog number	6es5257-4ua11
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Brand	Siemens
Part Number	6ES5257-4UA11
Product Type	Input Processor Module
Application Area	Industrial Automation
Product Family	SIMATIC S5

Description

The Siemens 6ES5257-4UA11 is a specialized Input Processor (IP) module designed for the SIMATIC S5 series programmable logic controllers (PLCs). This module facilitates the integration of incremental position encoders, enabling precise position control in automation systems.

It is particularly suited for applications requiring accurate position feedback, such as in servo systems and automated machinery. The 6ES5257-4UA11 is engineered for forced-ventilated environments, ensuring reliable operation in demanding industrial settings.

Its compact design allows for efficient use of panel space, making it ideal for systems with limited space. This module is part of Siemens' renowned SIMATIC S5 family, known for its robustness and versatility in industrial automation applications.
