

6ES5951-7LB13

Industrial automation components

Manufacturer	Siemens
Catalog number	6es5951-7lb13
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	1.56 kgs
Signal Type	230
Signal Level	230 V
Voltage	5 V
Current	3 A
Product Type	Module
Relay Specifications	230 VAC

Description

The Siemens 6ES5951-7LB13 is a power supply module designed for the SIMATIC S5-115U series PLC systems. It operates with an input voltage of 115/230 V AC and provides a regulated 5 V DC output at 3 A, ensuring stable power delivery for industrial automation applications. The module measures 195 mm in height, 310 mm in length, and 65 mm in width, with a weight of approximately 1.5 kg. Notably, this model does not require a backup battery, simplifying maintenance and reducing potential points of failure. As of October 1, 1999, the 6ES5951-7LB13 has reached the end of its product lifecycle. However, repairs can significantly extend its usability, maintaining compatibility with existing systems and offering cost-effective solutions. For those seeking replacements or repairs, authorized distributors like BVS Electronics GmbH offer services to support the continued operation of this module.
