Manufacturer	Siemens
Catalog number	6es7675-1db30-7aa0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	SIMATIC IPC427C Bundle
Software Included	WinCC flexible
Series	SIMATIC IPC427C
Brand	Siemens
Part Number	6ES7675-1DB30-7AA0
Software	WinCC flexible
Application Area	Industrial Computing

Description

The Siemens 6ES7675-1DB30-7AA0 is a component from the SIMATIC IPC427C series, designed for industrial automation applications. This model is part of Siemens' SIMATIC IPC427C Bundle, which includes the WinCC flexible software, providing a comprehensive solution for industrial computing needs.

The IPC427C series is known for its robust performance and reliability in demanding environments. Key features of the 6ES7675-1DB30-7AA0 include its compatibility with WinCC flexible, a software platform for visualization and control in industrial settings.

This integration allows for efficient monitoring and control of automation processes. The IPC427C is engineered to handle complex tasks, offering scalability and flexibility to meet various industrial requirements.

Its design ensures durability and consistent operation, making it suitable for applications where uptime is critical. The 6ES7675-1DB30-7AA0 is ideal for industries requiring reliable and efficient industrial computing solutions, such as manufacturing, process control, and automation systems.

Its combination of hardware and software provides a seamless platform for industrial automation, enhancing operational efficiency and productivity.
