Manufacturer	Siemens
Catalog number	6es7675-1db31-0fb1
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Processor Speed	0.004 µs per bit operation
Interfaces	PROFINET, Ethernet
Modular Design	Yes
Environmental Resilience	Industrial environments
Brand	Siemens
Part Number	6ES7 675-1DB31-0FB1
Product Type	Industrial Computer Module
Compatible Series	SIMATIC S7-300
Application Area	Industrial Automation

Description

The Siemens 6ES7 675-1DB31-0FB1 is a modular embedded controller from the SIMATIC S7 series, designed for industrial automation applications requiring robust and flexible control solutions. This controller is part of the EC31 series, offering high processing speeds and extensive connectivity options to meet diverse automation needs.

It is commonly utilized in applications such as CNC machines, automated production lines, and robotic systems, where precise control and reliability are paramount. Key features include: - **High Processing Speed**: Capable of executing bit operations in a minimum of 0.004 µs, ensuring rapid response times for complex automation tasks. - **Flexible Connectivity**: Equipped with multiple interfaces, including PROFINET and Ethernet, facilitating seamless integration into various industrial networks. - **Modular Design**: Allows for easy expansion and customization, adapting to

specific application requirements. - **Robust Performance**: Built to withstand the demanding conditions of industrial environments, ensuring continuous operation and minimal downtime.

This controller enhances the efficiency and reliability of automation systems, contributing to improved productivity and operational excellence in industrial settings.
