

## 6EV1352-5BK00

Industrial automation components

<b>Manufacturer</b>	Siemens
<b>Catalog number</b>	6ev1352-5bk00
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	1.23 kgs
<b>Signal Level</b>	254 V
<b>Voltage</b>	24 V
<b>Current</b>	20 A
<b>Signal Type</b>	254
<b>Relay Specifications</b>	254 VAC

### Description

The Siemens 6EV1352-5BK00 is a built-in power supply unit designed for industrial automation applications. This power supply unit is engineered to provide reliable and efficient power distribution within automation systems, ensuring optimal performance and stability. It is suitable for various industrial environments where consistent power supply is critical. The 6EV1352-5BK00 is part of Siemens' SIMODRIVE series, known for its high-quality components and advanced technology. Key features include a robust design for durability, compatibility with Siemens' automation systems, and adherence to international safety standards. This power supply unit is ideal for applications requiring a stable and continuous power source to drive automation processes effectively.
