Manufacturer	Siemens
Catalog number	6ew1861-5aa
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Input Voltage	220V AC V
Output Voltage (+5V)	5V
Output Current (+5V)	40A
Output Voltage (+15V)	15V
Product Type	Power Supply Unit

Description

The Siemens 6EW1861-5AA is a power supply unit designed for the SIMADYN D digital control system. It provides a stable 5V/40A output and a 15V output, operating on a single-phase 220V AC input. This unit is essential for ensuring reliable power distribution within the SIMADYN D system, supporting various industrial automation applications.

Its robust design and high output capacity make it suitable for demanding environments where consistent power supply is critical. The 6EW1861-5AA is part of Siemens' SINUMERIK series, known for precision and durability in industrial settings.
