

6FC5114-0AB01-0AA0

Industrial automation components

Manufacturer	Siemens
Catalog number	6fc5114-0ab01-0aa0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.41 kgs
Signal Level	230 V
Voltage	115 - 230 V
Frequency	50 - 60 Hz
Signal Type	230
Relay Specifications	230 VAC

Description

The Siemens 6FC5114-0AB01-0AA0 is a power supply module designed for the SINUMERIK 840C and 840CE central units in industrial automation systems. Operating on an input voltage range of 115–230 V AC and a frequency of 50/60 Hz, it provides a stable 24 V DC output with a current of 5 A, delivering a total output power of 120 W. This module ensures reliable energy delivery, supporting the demanding standards of modern production lines and minimizing downtime. Its robust construction and precise engineering make it suitable for integration in settings where consistent performance is critical. The 6FC5114-0AB01-0AA0 is engineered to meet the rigorous requirements of industrial environments, offering dependable operation for extended periods. Please note that this unit is delivered without additional power supply, CBS, or CPU components, allowing for flexible configuration according to operational requirements. Its design and specifications make it a valuable component for enhancing the efficiency and reliability of industrial automation systems.
