Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Siemens
Part Number	6FX1123-1BC02
Product Type	Interface Module
Application Area	CNC Systems
Category	Podzespoły automatyki przemysłowej

Description

The Siemens 6FX1123-1BC02 is an integral component of the SINUMERIK 880 GA2 CNC system, serving as the INT/SINEC H1 CP231 A interface module. Designed for seamless communication within the SINUMERIK 800 series, this module facilitates efficient data exchange between the central processing unit (CPU) and peripheral devices.

Its robust construction ensures reliable performance in demanding industrial environments, making it a critical element for maintaining the operational integrity of CNC machinery. The 6FX1123-1BC02 module is engineered to support high-speed data transmission, contributing to the precision and responsiveness required in advanced machining processes.

Its compatibility with the SINUMERIK 880 GA2 system underscores its role in enhancing the overall functionality and efficiency of Siemens' CNC solutions.
