

6FX2003-0DA00

Industrial automation components

Manufacturer	Siemens
Catalog number	6fx2003-0da00
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Drive
Dimensions	50 mm x 30 mm x 10 mm
Weight	0.20 kg
Compatibility	SIMODRIVE 611D
Application Area	Drive Bus Termination
Brand	Siemens

Description

The Siemens 6FX2003-0DA00 is a terminating plug designed for the drive bus of the SIMODRIVE 611D system. This component ensures proper signal termination, maintaining the integrity and reliability of the communication bus. It is an essential part for the optimal performance of the SIMODRIVE 611D drive system, which is widely used in industrial automation applications requiring precise motion control. The 6FX2003-0DA00 is characterized by its robust construction, ensuring durability and long-term operation in demanding environments. Its compact dimensions and straightforward installation process make it a convenient choice for system integrators and maintenance professionals. This terminating plug is compatible with the SIMODRIVE 611D system, providing seamless integration and support for the drive bus communication. For detailed specifications and installation guidelines, refer to the official Siemens datasheet.
