Manufacturer	Siemens
Catalog number	6mb5220-1cc35-6ba2ff
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Compact Input/Output Device
Switching Devices	6 Double Commands, 2 Single Commands
Signal Circuit Voltage Range	24V - 250V DC V
Current Inputs	3 AC
Voltage Inputs	3 AC
Fiber-Optic Connection Modules	3
Analog Inputs	2 DC for Transducer Connection
Software Version	V8
Auxiliary Voltage	220/250V DC V

Description

The Siemens 6MB5220-1CC35-6BA2/FF is a compact input/output device designed for industrial automation applications. Manufactured by Siemens, this model offers versatile control and monitoring capabilities within a single housing.

It features multiple switching devices, including six double commands and two single commands, facilitating efficient control operations. The device supports a wide range of signaling circuit voltages from 24V to 250V DC, accommodating various industrial environments.

Additionally, it provides three current inputs and three voltage inputs for comprehensive monitoring of electrical parameters. The inclusion of three fiber-optic connection modules enhances communication capabilities, ensuring reliable data transmission.

Two analog inputs are available for transducer connections, supporting 0...20mA signals without power measurement. The device operates with a software version V8, ensuring compatibility with modern control systems.

Auxiliary voltage requirements are 220/250V DC, aligning with standard industrial power supplies. This model is suitable for applications requiring robust and flexible control and monitoring solutions in compact form factors.
