Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Siemens
Part Number	6MD1010-0BA00/CC
Product Type	Communication Module
Application Area	Substation Automation
Interface Type	Electrical
Dongle Required	Yes
Dongle Part Number	6MD7160

Description

The Siemens 6MD1010-0BA00/CC is a high-performance communication module designed for integration with the SICAM substation automation platform. This module serves as an accessory for the SICAM Substation Controller and SICAM RTU MCP processor unit, providing essential electrical interfaces for data exchange with external systems.

It supports time synchronization and can be utilized in S7-400 systems without the SICAM dongle. Key features include dual electrical interfaces, compatibility with SICAM time synchronization module 6MD7160, and a compact design suitable for panel mounting.

This module is ideal for enhancing communication capabilities in SICAM protection and control systems, ensuring reliable and efficient data transmission within industrial automation environments.
