

## 6RB2130-0FD01

Industrial automation components

<b>Manufacturer</b>	Siemens
<b>Catalog number</b>	6rb2130-0fd01
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Legacy / discontinued

### Technical specification

<b>Weight</b>	5.49 kgs
<b>Current</b>	90 A
<b>Product Type</b>	Drive
<b>Relay Specifications</b>	90 A
<b>Current Rating</b>	30/90 A
<b>Dimensions</b>	260 mm x 230 mm x 50 mm
<b>Weight</b>	2.3 kg
<b>Compatible Motor Type</b>	DC Motor
<b>Product Family</b>	SIMODRIVE 210

### Description

The Siemens 6RB2130-0FD01 is a robust DC feed drive power module from the SIMODRIVE 210 series, engineered for precise motor control in industrial applications. Designed for single-axis operation, it offers a current rating of 30/90 A, ensuring reliable performance in demanding environments. This power module is compatible with DC motors, providing efficient and consistent power delivery. With dimensions of 260 mm in length, 230 mm in width, and 50 mm in height, it has a weight of approximately 2.3 kg, facilitating easy integration into existing systems. The 6RB2130-0FD01 is part of Siemens' legacy product line, with the last support year recorded as 2009, and is currently in the last year of support, with the phase-out date recorded as 08.10.2009. Despite its nearing obsolescence, the 6RB2130-0FD01 remains repairable, making it a viable option for extending functional lifespan without needing a complete overhaul. Choosing repair over replacement can lead to significant cost savings and reduced downtime. Specialized repair services are available to ensure continued operational efficiency and performance reliability.
