Description

The Siemens 6SL3100-0BE28-0AB0 is an Active Interface Module from the SINAMICS S120 series, designed to facilitate seamless integration between the control system and the power unit in industrial automation applications. This module is specifically engineered for 80 kW Active Line Modules, operating with a three-phase input of 380 to 480 V AC at 50/60 Hz, ensuring compatibility with standard industrial power supplies. Its robust design and precise engineering make it an ideal choice for applications requiring reliable and efficient power management.
