Description

The Siemens 6SL3203-0BE21-6SA0 is a SINAMICS Additional Line Filter Class B designed for power modules, ensuring compliance with electromagnetic compatibility (EMC) standards. This filter is suitable for 3-phase AC systems operating at 380-480V and up to 10.2A, providing effective suppression of electromagnetic interference (EMI) to maintain system performance and reliability. Its compact dimensions of 296 x 153 x 50 mm (H x W x D) facilitate easy integration into existing setups. The filter is intended for base mounting, offering flexibility in installation. As part of Siemens' SINAMICS series, it is engineered to enhance the performance and longevity of connected power modules by mitigating electrical noise. This product is ideal for applications requiring stringent EMC compliance, such as industrial automation systems, machinery, and equipment where maintaining signal integrity is crucial. Please note that the 6SL3203-0BE21-6SA0 has been discontinued since October 1, 2023, and is no longer in production.
