

6SL3210-1SE26-0AA0

Industrial automation components

Manufacturer	Siemens
Catalog number	6sl3210-1se26-0aa0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Input Voltage	380 to 480 V AC
Output Current	60 A
Rated Power	30 kW
Frame Size	FSD
Integrated Line Filter	Yes
Internal Air Cooling	Yes

Description

The Siemens 6SL3210-1SE26-0AA0 is a high-performance Converter Power Module from the SINAMICS S120 series, designed for demanding industrial applications requiring reliable and efficient power conversion. This module operates with a three-phase input voltage of 380 to 480 V AC at 50/60 Hz and delivers a three-phase output current of 60 A, providing a rated power of 30 kW. It features a blocksize frame size FSD with an integrated line filter and internal air cooling, ensuring optimal performance and longevity. The module is suitable for various applications, including cranes and general-purpose machinery, where precise and robust power control is essential. Its compact design and advanced cooling system make it ideal for integration into space-constrained environments without compromising on performance. For detailed specifications and integration guidelines, refer to the official Siemens Industry Mall product page.
