Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Siemens
Part Number	6SL3352-6TG38-1AA3
Product Type	SINAMICS drive power module
Voltage	500-690V AC
Rated Current	810 A
Frequency Range	50/60 Hz

Description

The Siemens 6SL3352-6TG38-1AA3 is a SINAMICS drive power module designed for industrial motor control applications. This module supports high-power operation and integrates seamlessly into advanced drive systems, making it suitable for demanding industrial environments.

Key features include compatibility with 500-690V 3-phase AC systems, a rated current of 810 A, and a frequency range of 50/60 Hz. The module is engineered for reliable performance in high-power settings, ensuring efficient motor control and system integration.

Its robust design and advanced features make it a valuable component for enhancing the performance and reliability of industrial automation systems.
