

6SN1111-0AA01-2DA0

Industrial automation components

Manufacturer	Siemens
Catalog number	6sn1111-0aa01-2da0
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	15.30 kgs
Voltage	440 V
Cooling Capacity	55 kW
Relay Specifications	440 VAC
Current	103 A
Power	55 kW
Product Type	Module
Signal Type	440
Signal Level	440 V

Description

The Siemens 6SN1111-0AA01-2DA0 is a line filter from the SIMODRIVE 611 series, designed for stabilized infeed applications up to 55 kW. It supports both sinusoidal and block-type current modes, ensuring reliable power delivery in industrial settings. This filter is engineered to enhance system efficiency by mitigating electrical noise and harmonics, thereby protecting sensitive equipment and improving overall performance. Its robust construction and compatibility with other SIMODRIVE 611 components make it a valuable addition to automation systems requiring stable and clean power inputs. Please note that this product has been discontinued as of February 9, 2006, and is now classified as obsolete. Despite its discontinued status, the 6SN1111-0AA01-2DA0 remains repairable, allowing for extended operational life through refurbishment services.
