Description

The Siemens 6SN1123-1AA00-0GA0 is a power module from the SIMODRIVE 611 series, designed for single-axis operation with a rated output current of 120 A. It features internal cooling and is suitable for applications requiring a motor rated current of 45 A for both single-phase and induction motors. This module is compatible with the SIMODRIVE 611-A/D drive system, providing efficient power handling for industrial automation tasks. Its robust construction ensures reliable performance in demanding environments.
