

6SN1123-1AA00-0LA1

Industrial automation components

Manufacturer	Siemens
Catalog number	6sn1123-1aa00-0la1
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	10.96 kgs
Current	108 A
Product Type	Module
Relay Specifications	108 A
Product Line	SIMODRIVE 611
Input Voltage	380-480 V AC
Output Voltage	0-600 V DC
Motor Current	45 A
Discontinued	Yes

Description

The Siemens 6SN1123-1AA00-0LA1 is a single-axis power module from the SIMODRIVE 611 series, designed for precise motor control in industrial applications. It features internal heat dissipation and is suitable for both 1-phase and asynchronous motors, with a rated motor current of 45 A for each. The module operates with an input voltage of 380-480 V AC and provides an output voltage up to 600 V DC, making it ideal for CNC systems and other motor control applications. Please note that this model is discontinued, with the final year of support ending on September 30, 2014. While data and software updates are no longer actively provided, the module remains repairable, offering a cost-effective and sustainable solution for existing industrial setups.
