

6SN1146-1BB02-0CA1

Industrial automation components

Manufacturer	Siemens
Catalog number	6sn1146-1bb02-0ca1
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.35 kgs
Input Voltage	400 V AC; 415 V AC
Rated Power	36 kW
Cooling Type	External
Mains Protection	Normally Closed Contact
Module Width	200 mm
Weight	12 kg

Description

The Siemens 6SN1146-1BB02-0CA1 is a SIMODRIVE 611 infeed/regenerative feedback module designed for industrial automation applications. This module operates within a power range of 36 to 47 kW, providing stabilized performance for demanding processes. It features external cooling to maintain optimal operating temperatures, enhancing system reliability and longevity. The integrated mains protection with a normally closed contact ensures additional safety by preventing potential electrical faults. This module is compatible with the SIMODRIVE 611 drive system, offering seamless integration for advanced motion control solutions. Its robust design and protective features make it suitable for various industrial environments requiring efficient and secure power management.
