

## 6SN1161-1CA00-0CA1

Industrial automation components

<b>Manufacturer</b>	Siemens
<b>Catalog number</b>	6sn1161-1ca00-0ca1
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Legacy / discontinued

### Technical specification

<b>Weight</b>	0.45 kgs
<b>Product Type</b>	Drive Bus Module
<b>Module Width</b>	150 mm
<b>Cable Type</b>	Round Cable
<b>Manufacturing Country</b>	Germany
<b>Repairable</b>	Yes

### Description

The Siemens 6SN1161-1CA00-0CA1 is a high-performance drive bus module from the SIMODRIVE 611-D series, designed for industrial automation applications. This module accommodates a module width of 150 mm and utilizes a round cable for connectivity, ensuring reliable and efficient operation in demanding environments. Manufactured in Germany, it reflects Siemens' commitment to quality and precision engineering. Despite its official cancellation on April 1, 2015, the 6SN1161-1CA00-0CA1 remains a valuable component for maintaining legacy systems. Its repairable design offers a cost-effective solution for extending the lifespan of existing equipment, making it a practical choice for businesses seeking to optimize their automation infrastructure without the need for immediate replacements. For professional repair services, companies like UNIS Group provide expert solutions to restore and maintain the efficiency of this device, ensuring operational continuity and system stability.
