## Description

The Siemens 6XV1440-4AN20 is a 20-meter connecting cable designed for Mobile Panels operating over MPI/PROFIBUS interfaces. This high-quality cable ensures reliable communication between mobile panels and PLCs, facilitating seamless industrial automation processes. Key features include a robust construction with an IP65 protection rating, making it suitable for demanding environments. The cable is flame-resistant, adhering to VDE 0472 Part 804 Test Type B standards, and is resistant to oils and various chemicals, ensuring longevity and durability. With a minimum bending radius of 45 mm, it offers flexibility for installation in tight spaces. The cable sheath is red, providing easy identification in complex setups. This product is compliant with RoHS directives, ensuring it meets environmental standards. The Siemens 6XV1440-4AN20 is an essential component for establishing dependable connections in industrial automation systems, particularly where mobile panels are utilized.
