

## 78-092-0300

Industrial automation components

<b>Manufacturer</b>	Siemens
<b>Catalog number</b>	78-092-0300
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	0.90 kgs
<b>Voltage</b>	115 - 230 V
<b>Signal Type</b>	230
<b>Signal Level</b>	230 V
<b>Relay Specifications</b>	230 VAC

### Description

The Siemens 78-092-0300 is a power supply unit designed for industrial automation applications, particularly within the SINUMERIK 840C/840CE series. Manufactured by Siemens, this component ensures reliable power distribution and management, crucial for the optimal performance of CNC systems. Key features include a voltage input range of 115 - 230 V, accommodating various industrial power standards. The unit operates with a signal type and level of 230 V, ensuring compatibility with standard industrial control systems. Its compact dimensions—7.0 cm in height, 28.0 cm in length, and 9.0 cm in width—facilitate easy integration into existing setups. Weighing approximately 1.0 kg, it offers a balance between durability and manageability. This power supply unit is ideal for applications requiring consistent and efficient power delivery, such as CNC machinery, automated production lines, and other industrial automation systems. Its robust design and Siemens' reputation for quality make it a dependable choice for enhancing system reliability and performance.
