### Description

The Siemens A5E00381705 is a frequency converter 17-pin connector designed for industrial automation applications. Manufactured by Siemens, this component is integral to the SIMOVERT series, facilitating efficient power conversion and distribution within automation systems. Its compact dimensions—10 mm in height, 85 mm in width, and 90 mm in length—make it suitable for installations with limited space. Weighing approximately 0.04 kg, it offers a lightweight solution without compromising on performance. This module is typically used in conjunction with Siemens' inverter systems, serving as a terminal module that ensures reliable electrical connections and optimal system functionality. Its robust construction and precise engineering make it a preferred choice for professionals seeking dependable components in their automation setups.
