Ask about this product

Manufacturer	Yaskawa
Catalog number	sgdb-10vn
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Brand	Yaskawa
Part Number	SGDB-10VN
Product Type	AC Servo Drive
Rated Output	1.0 kW
Supply Voltage	200V
Input Configuration	Three-phase
Servo Motor Compatibility	Yaskawa Σ-series
Application Area	Industrial Automation

Description

The Yaskawa SGDB-10VN is a high-performance AC servo drive designed for precise motion control in industrial automation applications. Manufactured by Yaskawa, a leader in motion control technology, this model offers reliable and efficient operation for various automation tasks. Key features include a rated output of 1.0 kW, a supply voltage of 200V, and a three-phase input configuration. The SGDB-10VN is compatible with Yaskawa's Σ-series servomotors, providing seamless integration for enhanced performance. Its compact design ensures easy installation in space-constrained environments, making it suitable for applications requiring precise speed and torque control. This servo drive is ideal for use in machinery such as CNC machines, robotics, and packaging equipment, where high precision and reliability are essential.
