

BRAND & MANUFACTURER PORTFOLIO

**AUTOMATION
TRADER**

WHY AUTOMATION TRADER?

At Automation Trader, we understand that reliability, component availability, and price flexibility are the cornerstones of modern industry.

To meet these demands, our offer includes products in various conditions - new, used, and refurbished - as well as professional repair services. This variety allows you to choose a solution that perfectly fits your technical requirements and budget. We support both large-scale industrial plants and small enterprises, ensuring that all components from world-renowned manufacturers are rigorously tested in our laboratory before shipment.

We also offer a dedicated "Secure Your Production" package. Instead of merely reacting to crises, you receive comprehensive daily support: from expert technical consulting to strategic parts warehousing. It is the ideal solution for companies that prioritize predictability and aim for a zero-downtime manufacturing process.

KEY MANUFACTURERS IN OUR PORTFOLIO

Everything for Industry in One Place.

Automation Trader is the go-to destination for companies seeking reliability. We provide a full spectrum of components from the world's leading manufacturers:

- Market Leaders: Siemens, Omron, Schneider, Allen Bradley, Mitsubishi, ABB, Festo.
- Specialists: Pilz, Beckhoff, Keyence, Fanuc, Danfoss, Yaskawa.

Our range includes: PLCs, sensors, drives, robotics, pneumatics, hydraulics, and safety systems.

We combine global availability with a personalized approach to every project.

SIEMENS

Siemens is a global leader in industrial automation, offering advanced solutions for Industry 4.0.

The company provides innovative control, automation, and digitalization systems that help enterprises enhance production efficiency, reliability, and flexibility.

The Siemens portfolio includes PLCs, SCADA systems, IoT solutions, and intelligent drive systems, enabling full integration and real-time process monitoring.

Why choose this manufacturer?

- Comprehensive Industrial Automation Solutions
- Motors, controllers, pneumatic components
- Product codes in alphanumeric format
- Key partner in the Automation Trader portfolio

☎ +48 32 438 43 56 / +48 799 361 559

Omron is a recognized global supplier of modern industrial automation, supporting the development of intelligent and flexible production systems.

The company specializes in advanced control technologies, sensors, robotics, and vision systems that drive process automation and quality improvement.

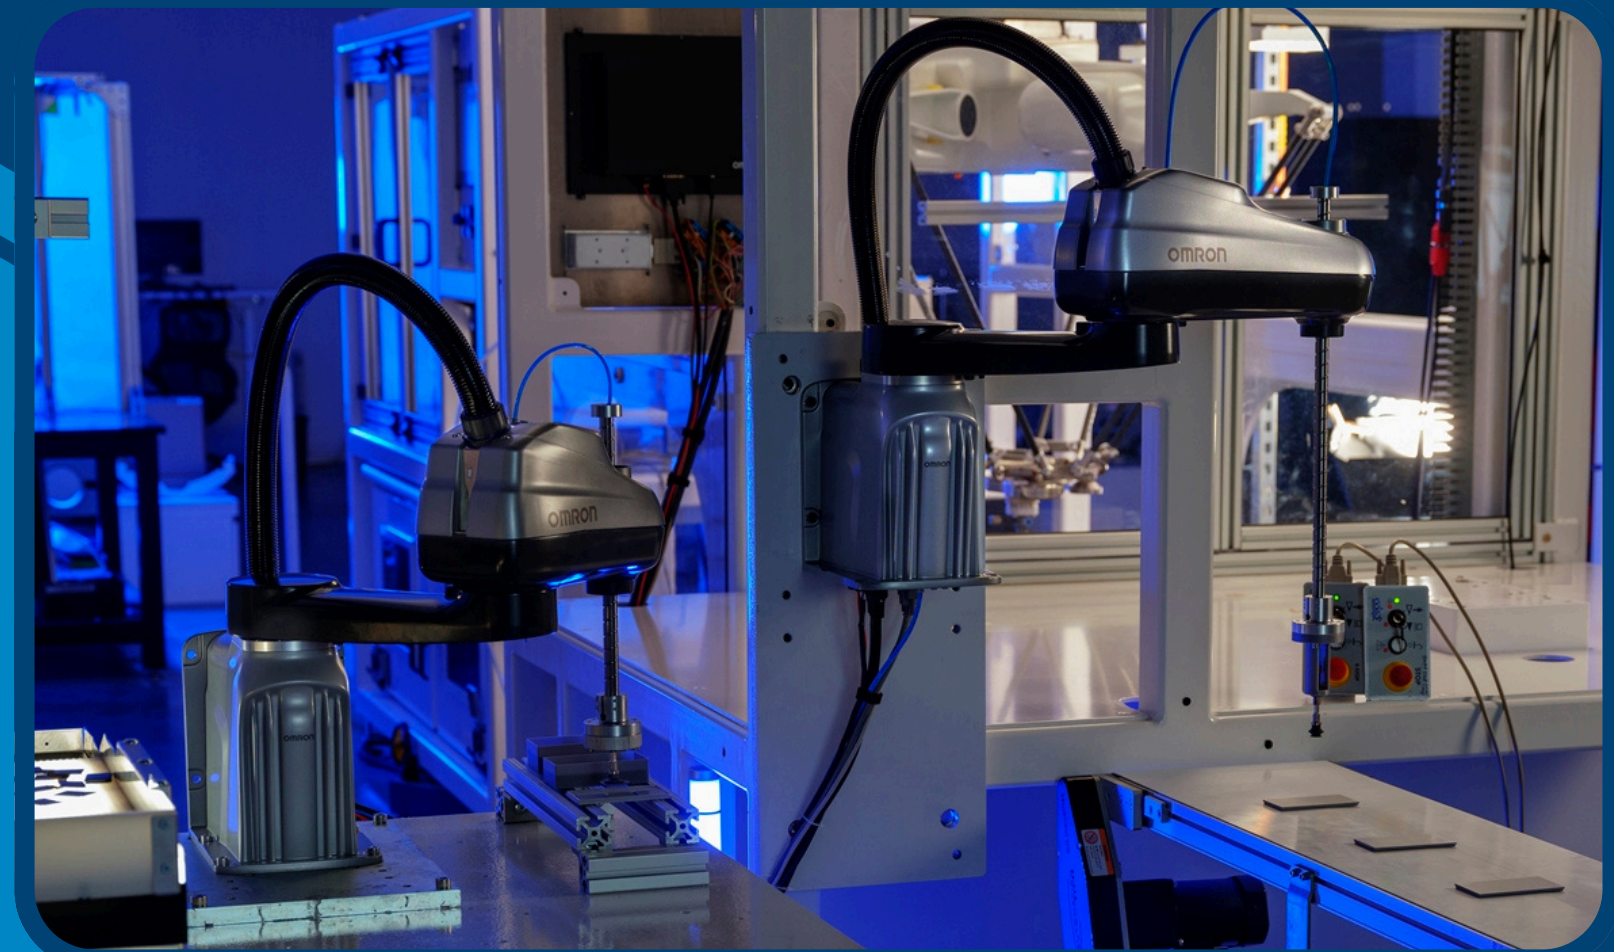

Omron's solutions are a key element of industrial digital transformation, enabling companies to achieve higher efficiency, precision, and operational safety.

Why choose this manufacturer?

- Specialization in sensors, controllers, and robotics
- Solutions for Industry 4.0
- Key partner for sensing and robotics
- Flexible automation of production lines

 info@automationtrader.com

 +48 32 438 43 56 / +48 799 361 559

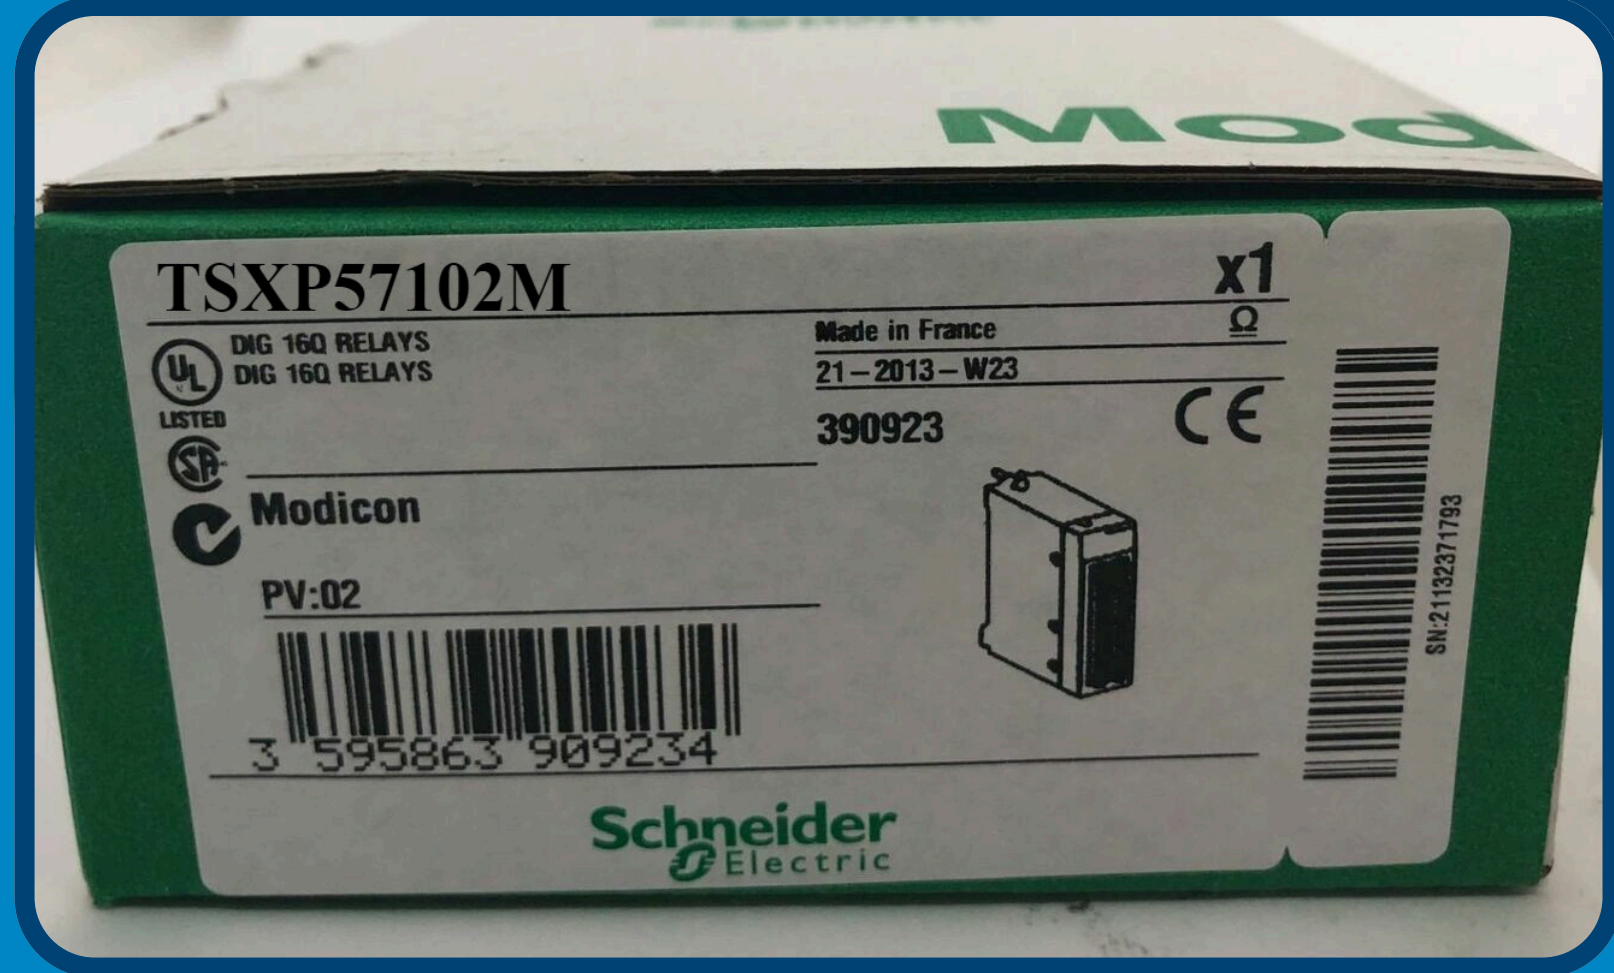

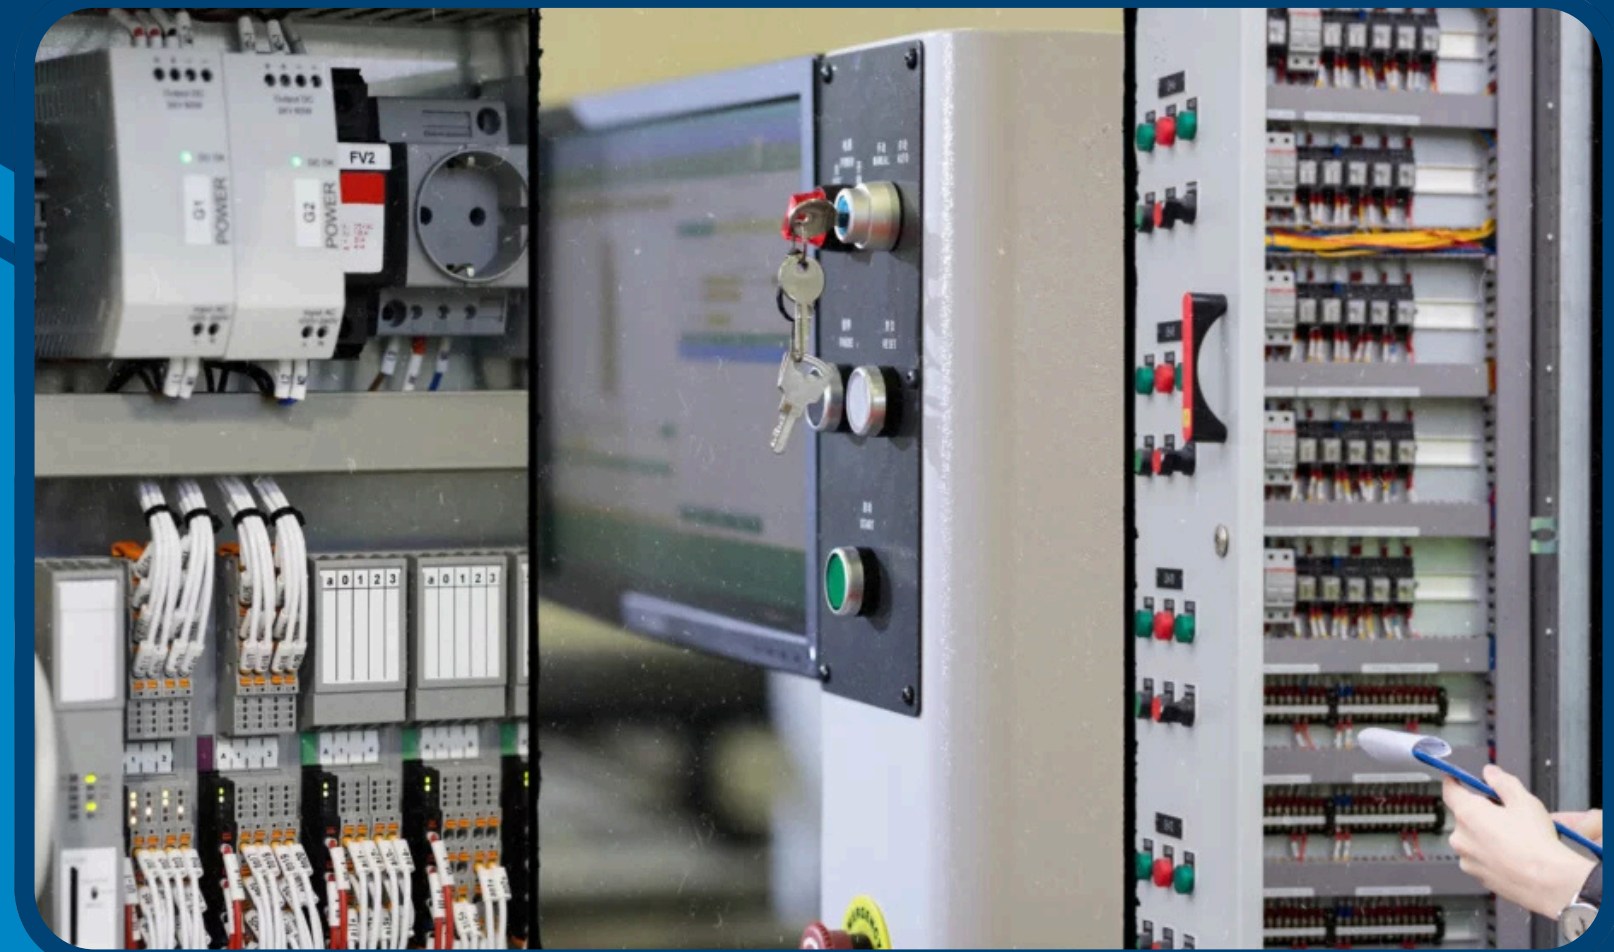

Schneider Electric is a global expert in energy management and industrial automation, providing comprehensive solutions for sustainable and efficient industry.

The company delivers modern control systems, industrial software, SCADA, and edge computing solutions that support the digitalization and optimization of production processes.

Schneider Electric's technologies enable the integration of automation with energy management, resulting in higher operational efficiency, flexibility, and alignment with Industry 4.0 principles.

Why choose this manufacturer?

- French energy and automation corporation
- Prisma G series products - enclosures and accessories
- Strategic supplier of energy solutions
- Modularity of solutions

☎ +48 32 438 43 56 / +48 799 361 559

Allen-Bradley

Allen-Bradley, a Rockwell Automation brand, is a renowned provider of industrial automation solutions, known for its reliability and high-quality components.

The company offers a broad product portfolio, including PLCs, HMI systems, drives, and industrial networks that support digitalization and production optimization.

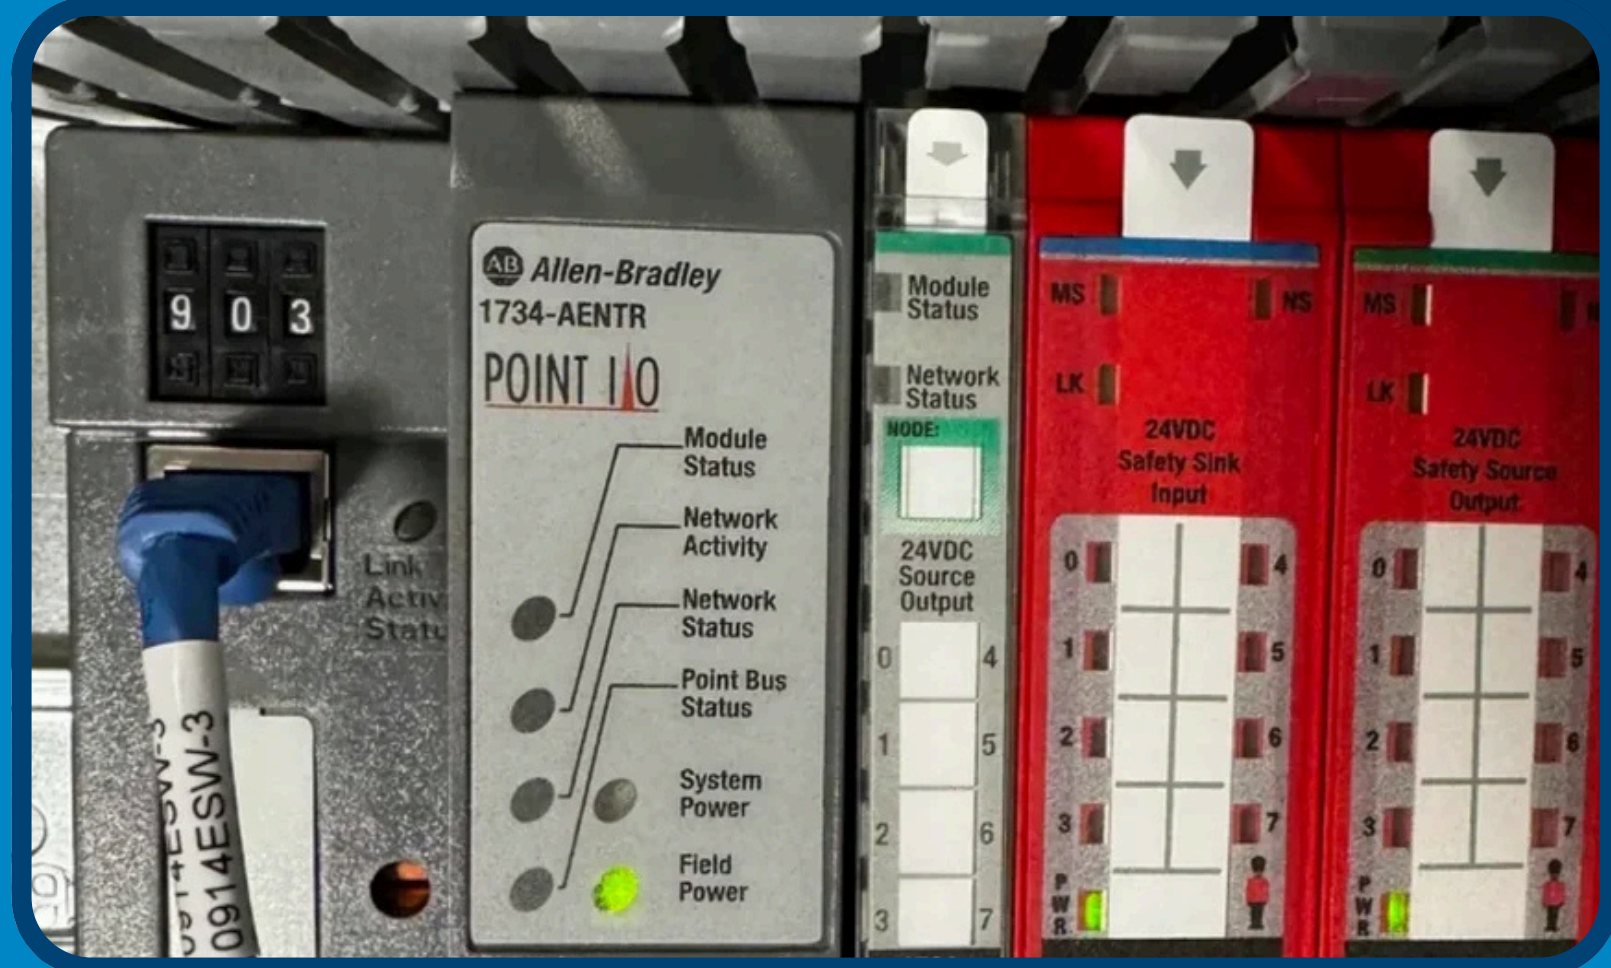

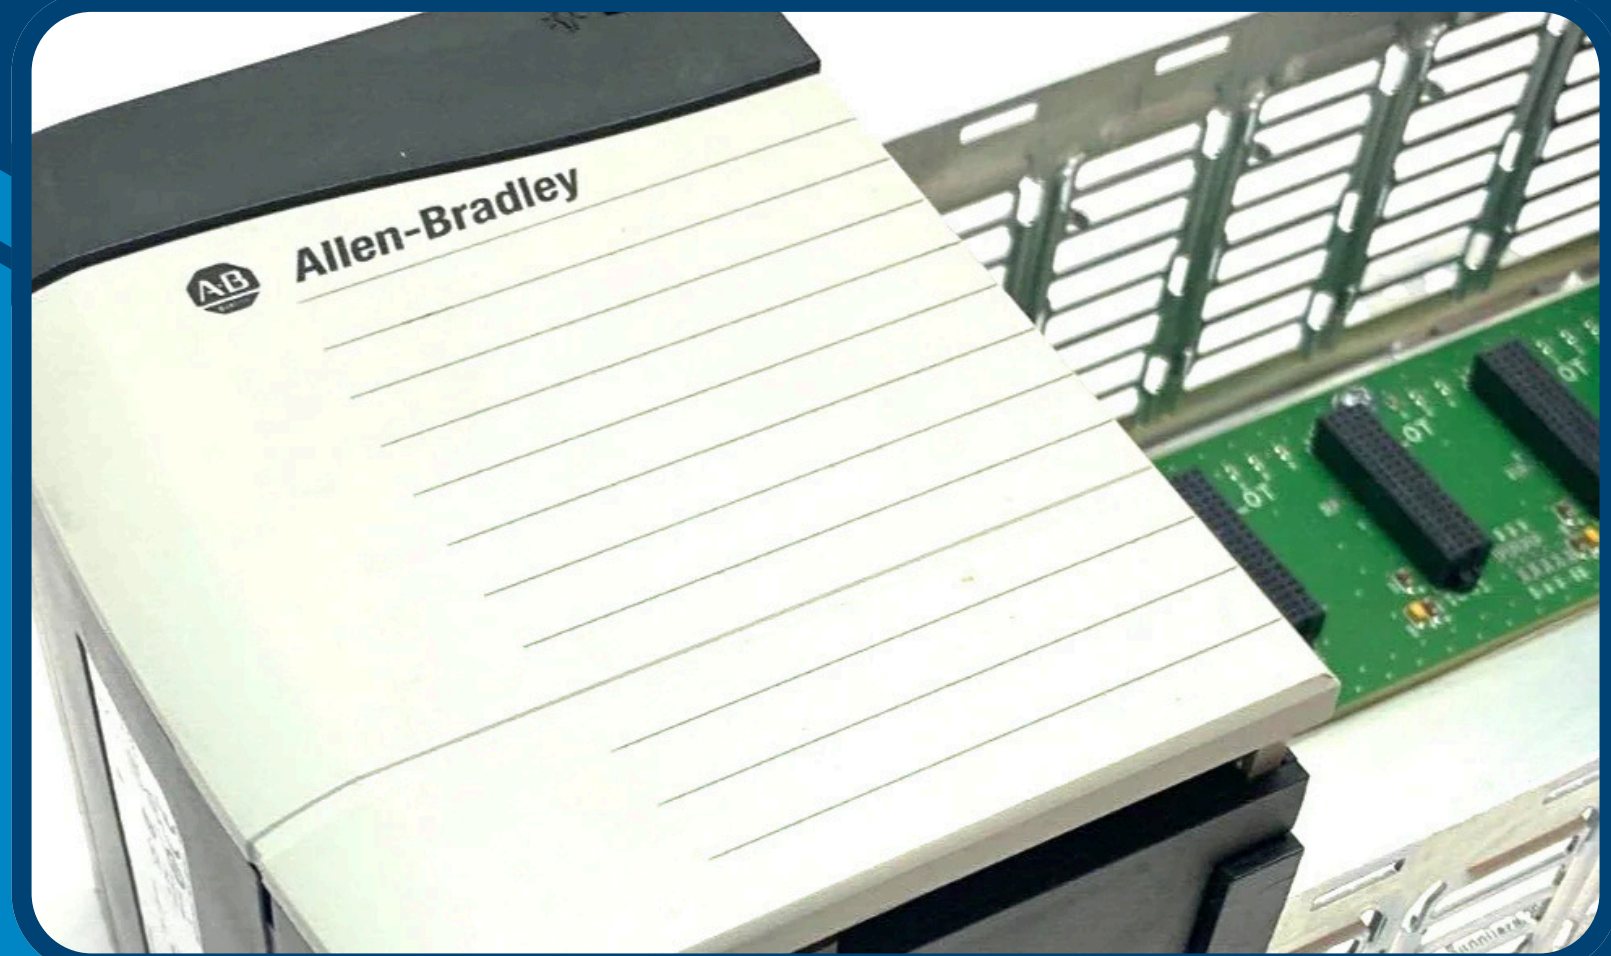

Allen-Bradley solutions are designed for easy integration, scalability, and meeting the requirements of modern, smart manufacturing facilities.

Why choose this manufacturer?

- Durable and high-performance controllers
- Intuitive HMI systems - user-friendly panels
- Advanced network solutions for integration
- Extensive technical support base

 info@automationtrader.com

 +48 32 438 43 56 / +48 799 361 559

Mitsubishi Electric is a Japanese leader in industrial automation, providing comprehensive solutions for modern manufacturing plants.

The company delivers advanced PLCs, HMI systems, robotics, and drive technologies that enhance the efficiency, flexibility, and precision of industrial processes.

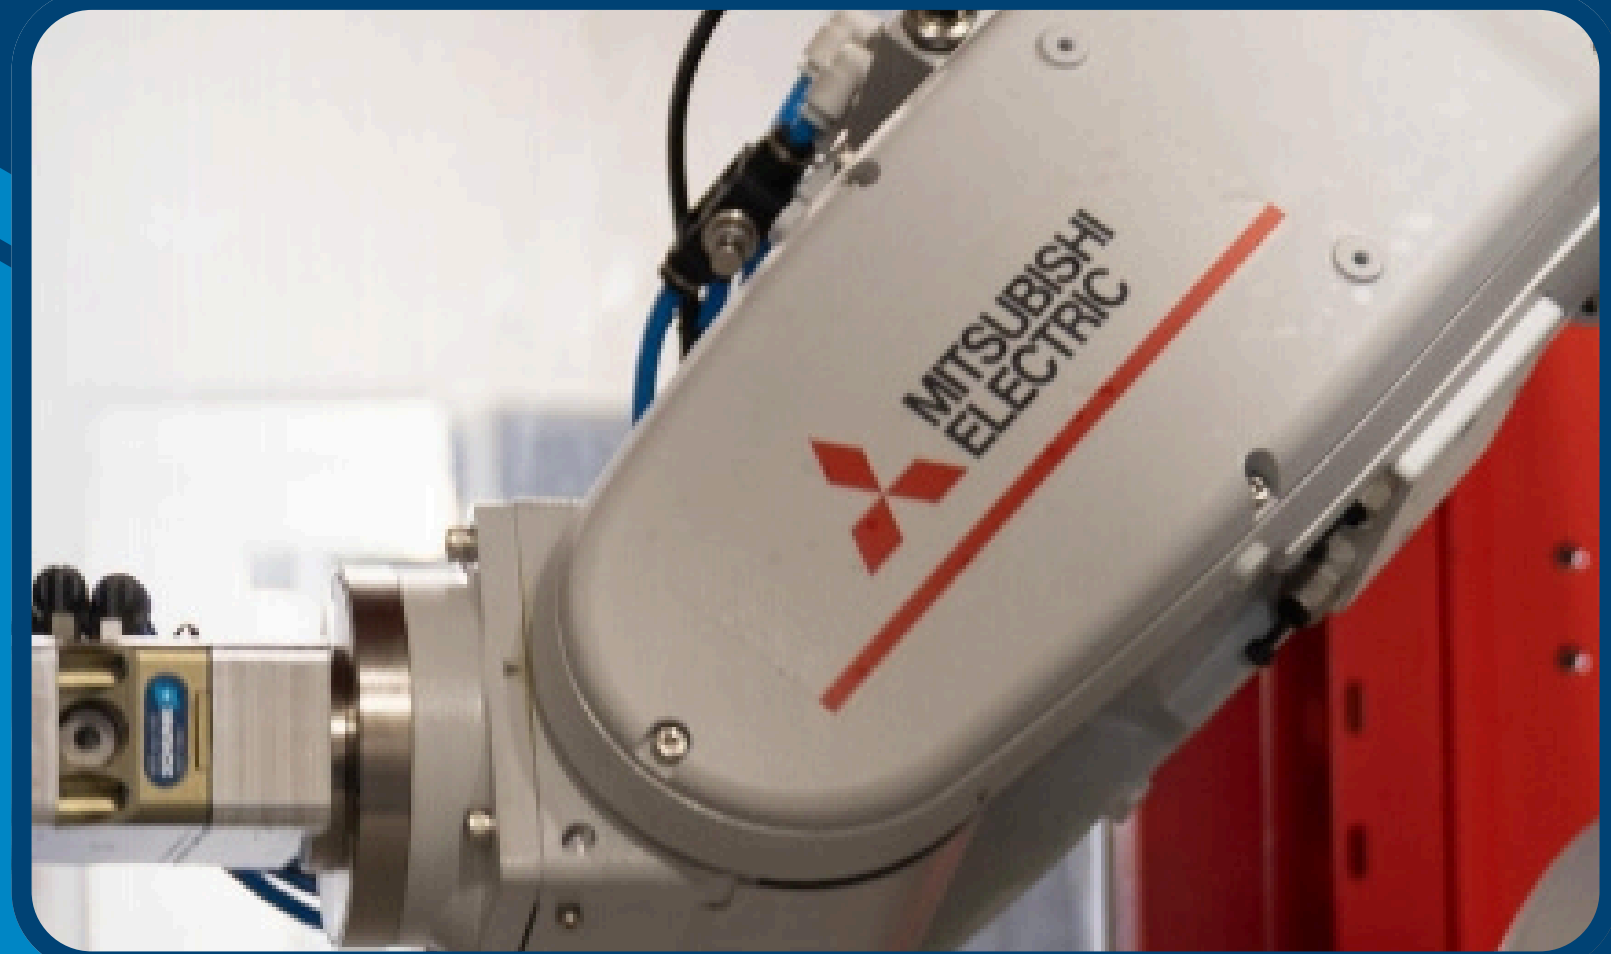

Mitsubishi Electric focuses on reliability and ease of integration, supporting the digitalization and automation of Industry 4.0 worldwide.

Why choose this manufacturer?

- Precise and reliable controllers and drives
- Advanced robotic solutions Intuitive
- HMI interfaces - process monitoring
- High product availability and technical support

 info@automationtrader.com

 +48 32 438 43 56 / +48 799 361 559

SICK

Sensor Intelligence.

SICK is a global leader in the manufacturing of intelligent sensors and measurement systems for industrial automation.

The company delivers advanced detection, measurement, and analysis technologies that enhance the precision, safety, and efficiency of production processes.

SICK products are essential in production line automation, robotics, and quality control systems, driving Industry 4.0 innovations.

Why choose this manufacturer?

- Precise and reliable sensors
- Solutions for accurate detection and process analysis
- Technologies for enhanced protection and quality improvement
- High availability and professional consulting

✉ info@automationtrader.com

☎ +48 32 438 43 56 / +48 799 361 559

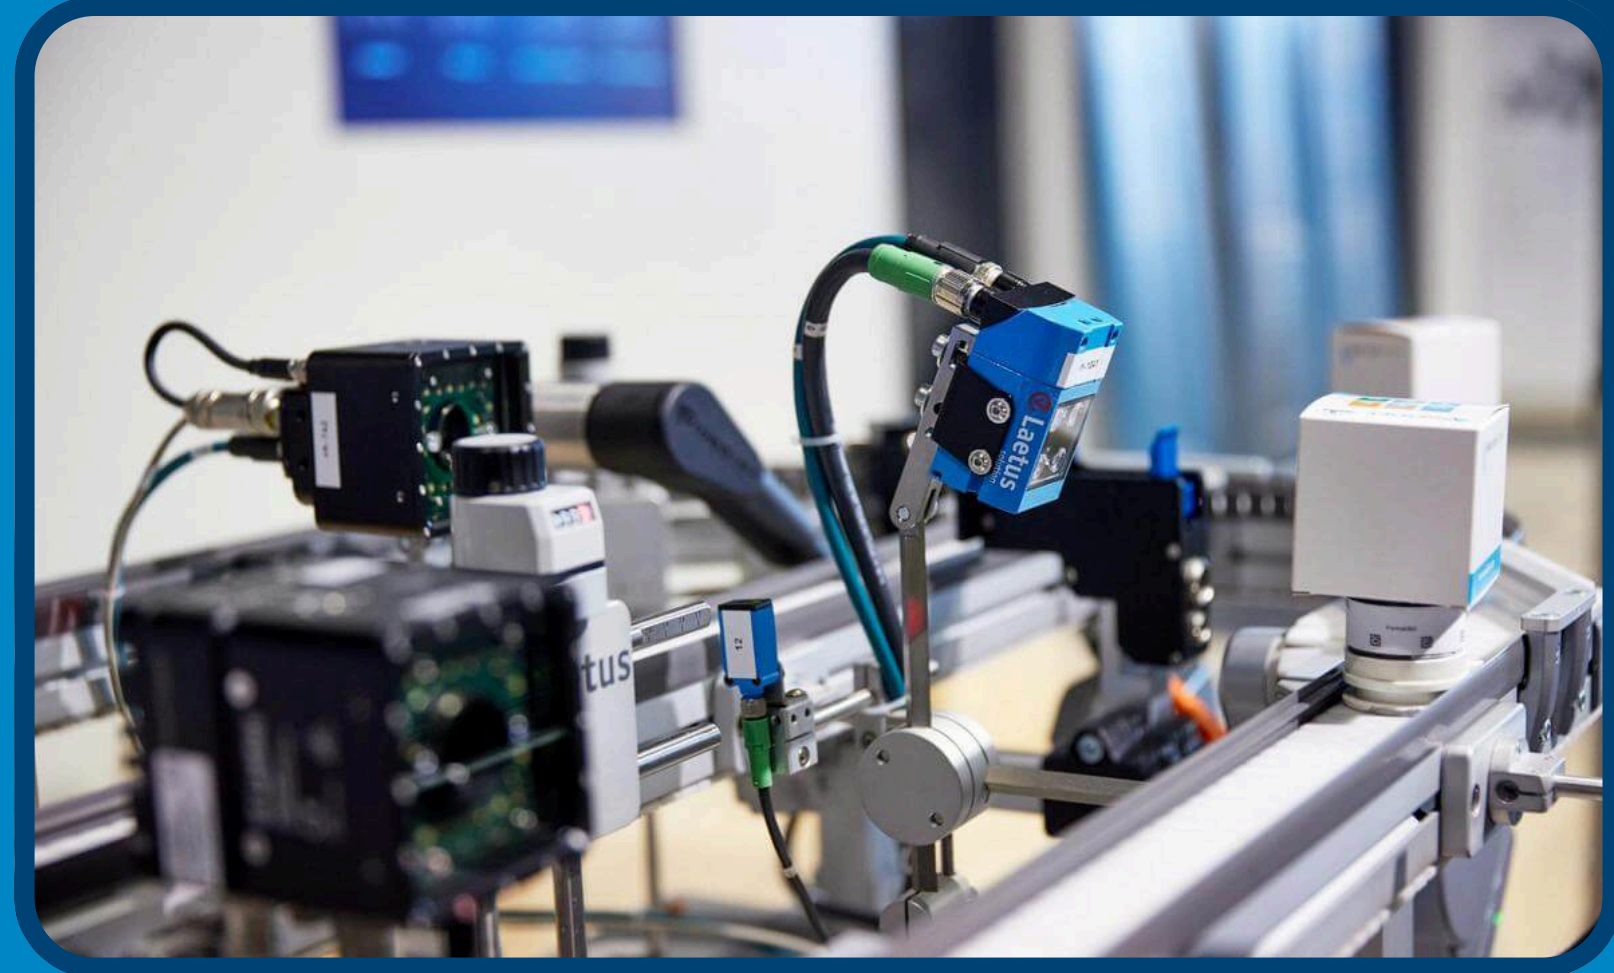

ABB is a global leader in industrial automation and robotics, offering advanced solutions that support the digitalization and optimization of production processes.

The company provides a broad product portfolio, including controllers, industrial robots, drives, and energy management systems that enhance the efficiency, flexibility, and safety of manufacturing plants.

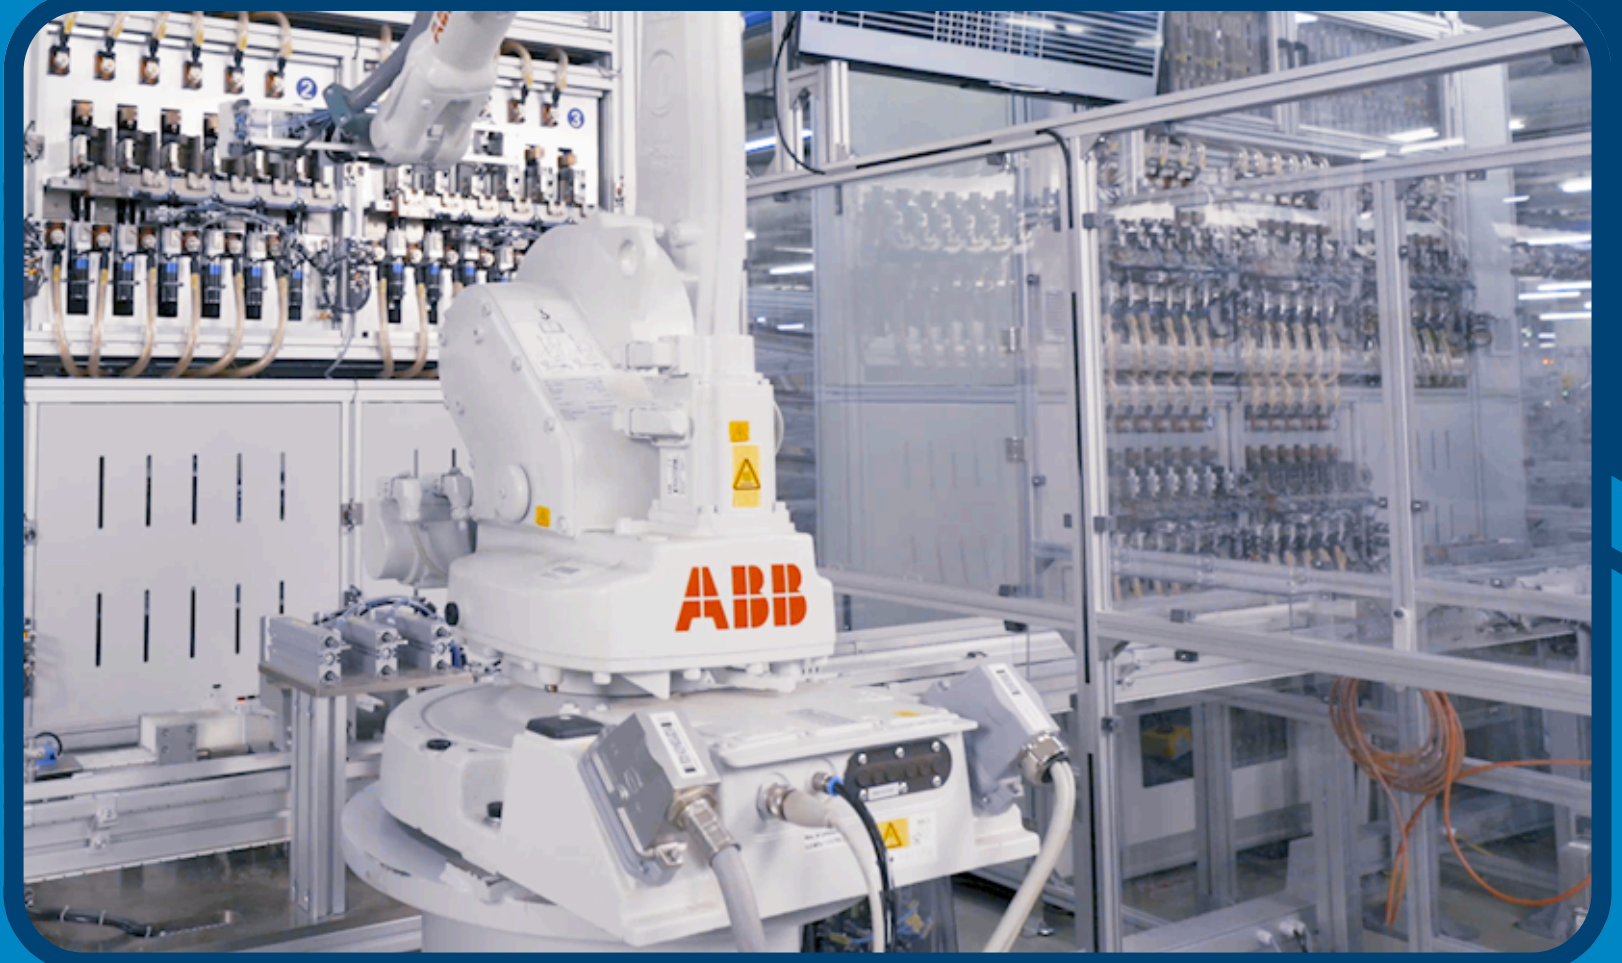

ABB is renowned for its innovative technologies and global support for customers across diverse industrial sectors.

Why choose this manufacturer?

- Offer covering advanced robotics
- Efficient drive solutions for various applications
- Digital solutions and energy management
- Global presence and support

 info@automationtrader.com

 +48 32 438 43 56 / +48 799 361 559

FESTO

Festo is a leading supplier of intelligent automation and industrial pneumatics, valued for innovation, precision, and high-quality craftsmanship.

The company offers comprehensive motion control components and systems - from valves and actuators to advanced mechatronic systems and software.

Festo supports the development of modern, flexible production lines, aligning perfectly with the principles of Industry 4.0.

Why choose this manufacturer?

- Leading pneumatic technologies
- Solutions combining pneumatics and electronics
- Strong commitment to technical training
- Durability, repeatability, and precise operation

✉ info@automationtrader.com

☎ +48 32 438 43 56 / +48 799 361 559

YASKAWA

Yaskawa is a global leader in electric drives, motion control, and industrial robotics, renowned for its reliability, innovation, and high precision.

The company offers a wide range of products, including servo drives, inverters, motion controllers, and industrial robots that support process automation across numerous industries.

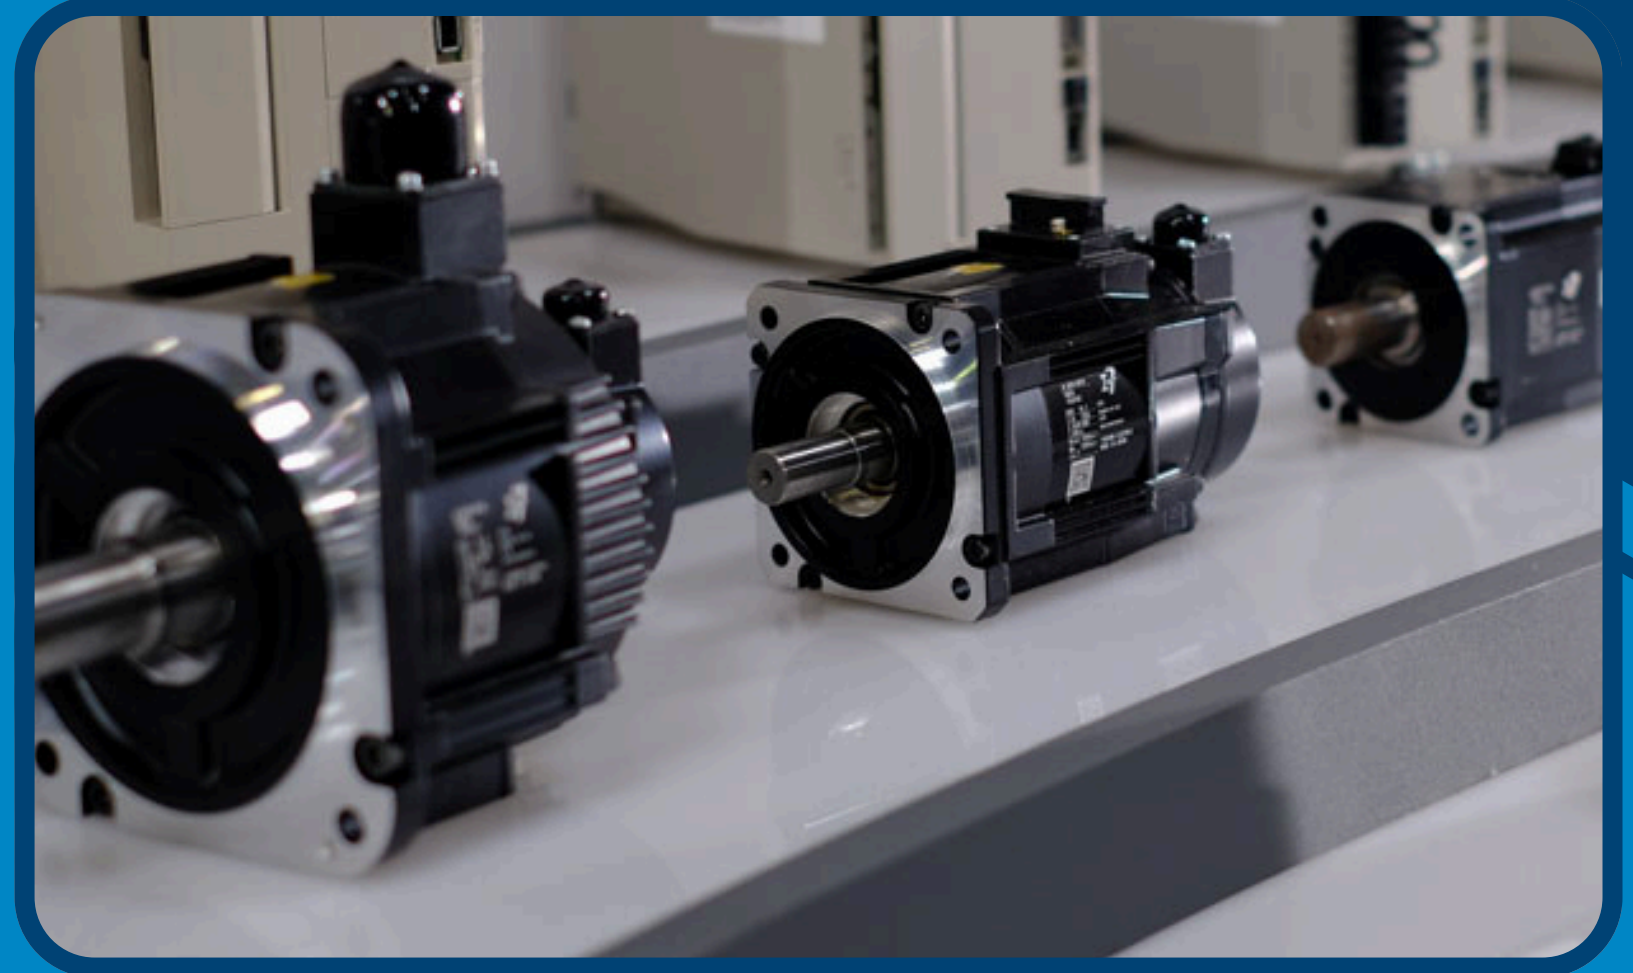

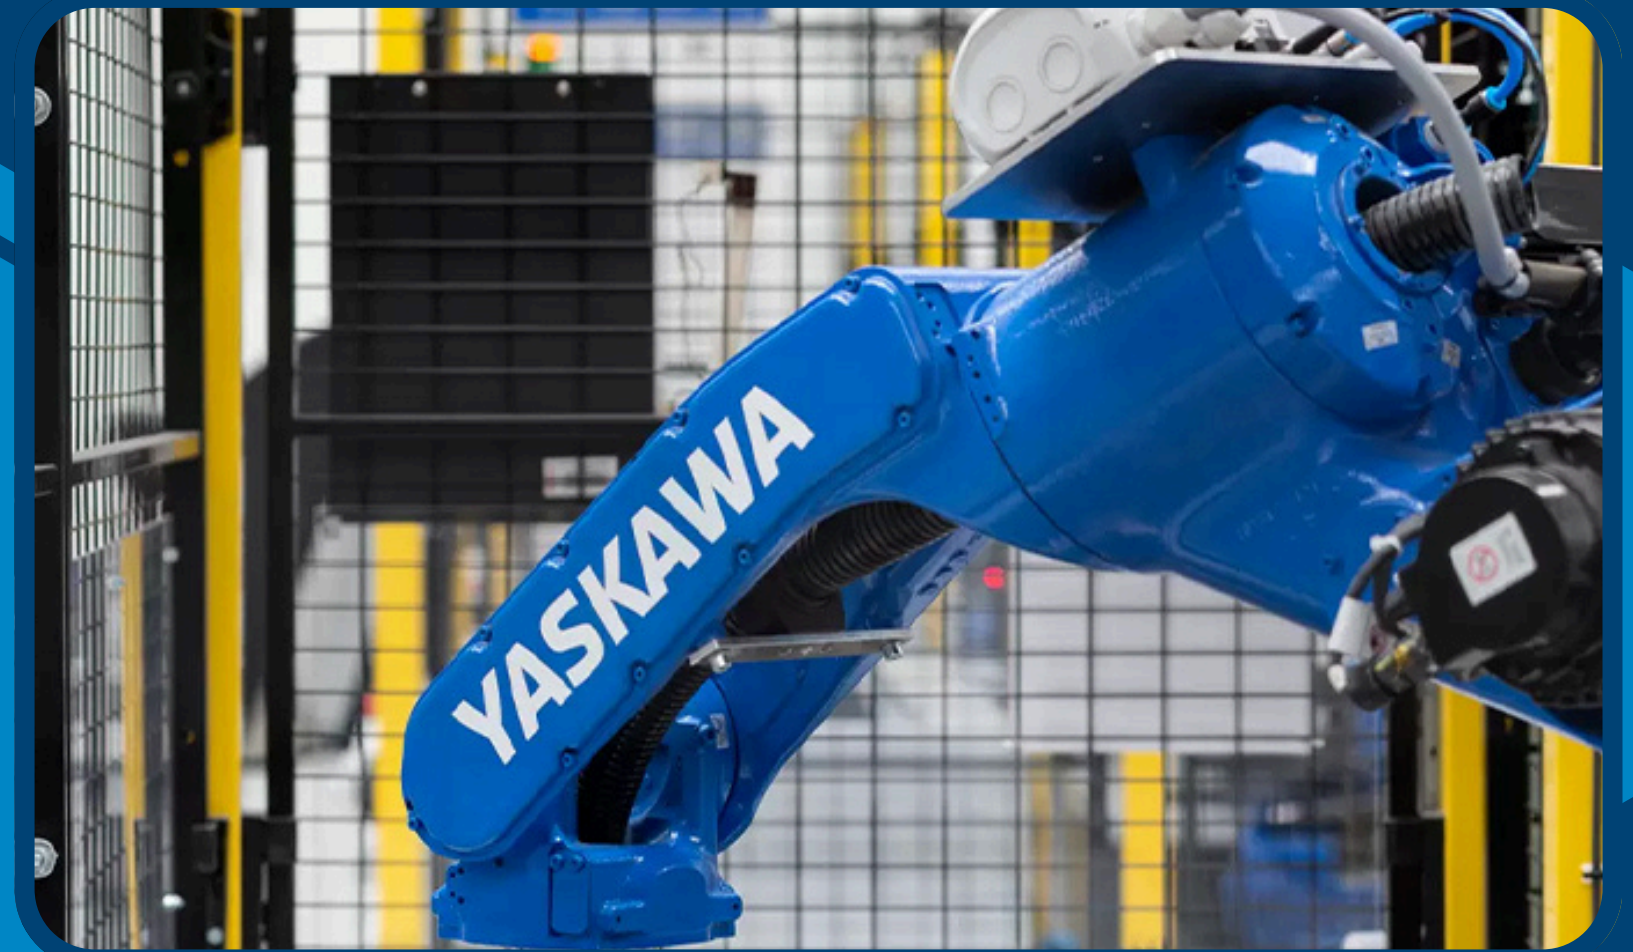

Yaskawa solutions enhance production efficiency, flexibility, and quality, perfectly aligning with the requirements of Industry 4.0.

Why choose this manufacturer?

- Reliable drives with high precision and performance
- Versatile Motoman industrial robots
- Comprehensive motion control systems
- Products valued for durability, precision, and reliability

✉ info@automationtrader.com

☎ +48 32 438 43 56 / +48 799 361 559

Bosch Rexroth is a renowned provider of advanced drive and control technologies, offering comprehensive solutions in automation, hydraulics, and mechatronics.

The company delivers innovative drive systems, controllers, actuators, and intelligent Industry 4.0 solutions that support digitalization, energy efficiency, and production flexibility.

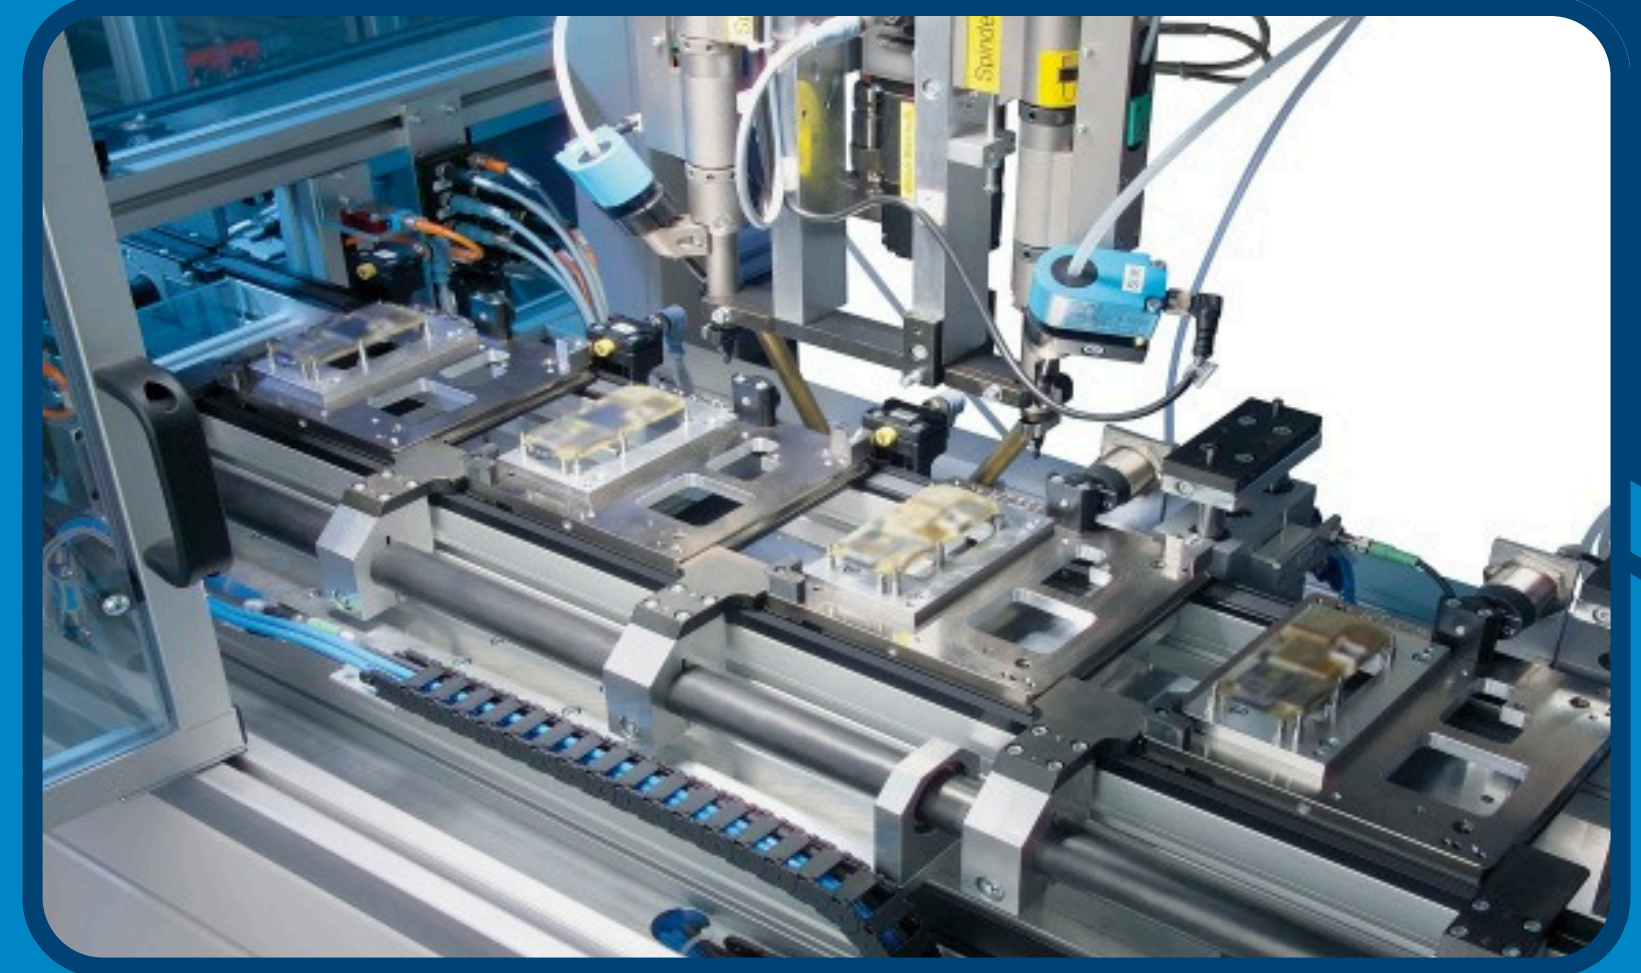

Bosch Rexroth combines German precision with a global reach and expertise in the most demanding industrial sectors.

Why choose this manufacturer?

- Leader in drive and hydraulic technology
- Mechatronic systems and modularity
- Support for industrial protocols and integration
- Emphasis on energy efficiency and automation

GERMAN SPECIALIZED MANUFACTURERS

- **PILZ** - Safety systems, a vital partner in industrial safety
- **PHOENIX CONTACT** - Electrical connections, a key provider of connectivity solutions
- **BECKHOFF** - PC-based automation, a strategic partner in PC-based control
- **LEUZE** - Optical sensors and measurement systems
- **WAGO** - Connection technology and interfaces

EUROPEAN LEADERS

- **KUKA** - Industrial robotics, a major provider of industrial robots
- **DANFOSS** - Drives, cooling, and energy systems
- **EATON** - Electrical and power management solutions
- **B&R** - Industrial automation and control systems

JAPANESE INNOVATORS

- **SMC** - Industrial pneumatics
- **KEYENCE** - Sensors, vision systems, and measurement systems
- **FUJI** - Electrical components and electronics
- **PANASONIC** - Industrial electronics and automation
- **FANUC** - CNC, industrial robotics, a strategic provider of CNC solutions

WHAT PARTS CAN YOU FIND IN OUR OFFER?

- **Servo Drives & Inverters** – High-performance motion control and frequency converters.
- **PLC Systems** – Programmable logic controllers and I/O modules.
- **Power Supplies** – Reliable industrial power units and converters.
- **AC & DC Motors** – A wide selection of electric motors for various applications.
- **Encoders & Measurement Systems** – Precision feedback devices and linear scales.
- **HMI Panels** – Intuitive operator interfaces and touchscreens.
- **Cables, Wires, Plugs & Connectors** – Comprehensive connectivity and wiring solutions.
- **Electronic Components** – Passive and active components for industrial boards.
- **Semiconductor Modules** – IGBTs, thyristors, and power modules.
- **Contactors, Transformers, Current Transformers & Disconnectors** – Power distribution and switching equipment.
- **Industrial PCs & Components** – Rugged computing solutions and hardware.
- **Batteries, Fans & Fuses** – Essential maintenance parts and thermal management.
- **Industrial Hydraulics & Pneumatics** – Fluid power components and air systems.
- **Robotics** – Industrial robots, controllers, and peripheral equipment.
