

PRODUCT CONDITION OVERVIEW

**AUTOMATION
TRADER**

WHY CHOOSE AUTOMATION TRADER?

At Automation Trader, we understand the critical importance of reliability, part availability, and pricing flexibility in the industry.

That is why our offer includes products in various conditions - new, used, refurbished, and repair options - allowing you to choose exactly what you need.

We serve both large industrial plants and small businesses, and our industrial automation components come from renowned manufacturers and are thoroughly tested before sale.

Our offer also includes the "Secure Your Production" package. Instead of reacting to crises, you receive full daily support: from consultancy to parts warehousing. This is a solution for companies that want to operate predictably and without downtime.

EXTENSIVE RANGE OF COMPONENTS

In our offer, you will find a full range of industrial automation parts - from new and originally packaged components to those that provide more budget-friendly options and save production when deadlines are tight.

NSB

New, sealed box

This is the highest quality standard among industrial automation components.

We offer new parts in original, factory-sealed manufacturer packaging. This ensures you can be confident in the origin and technical condition of every element.

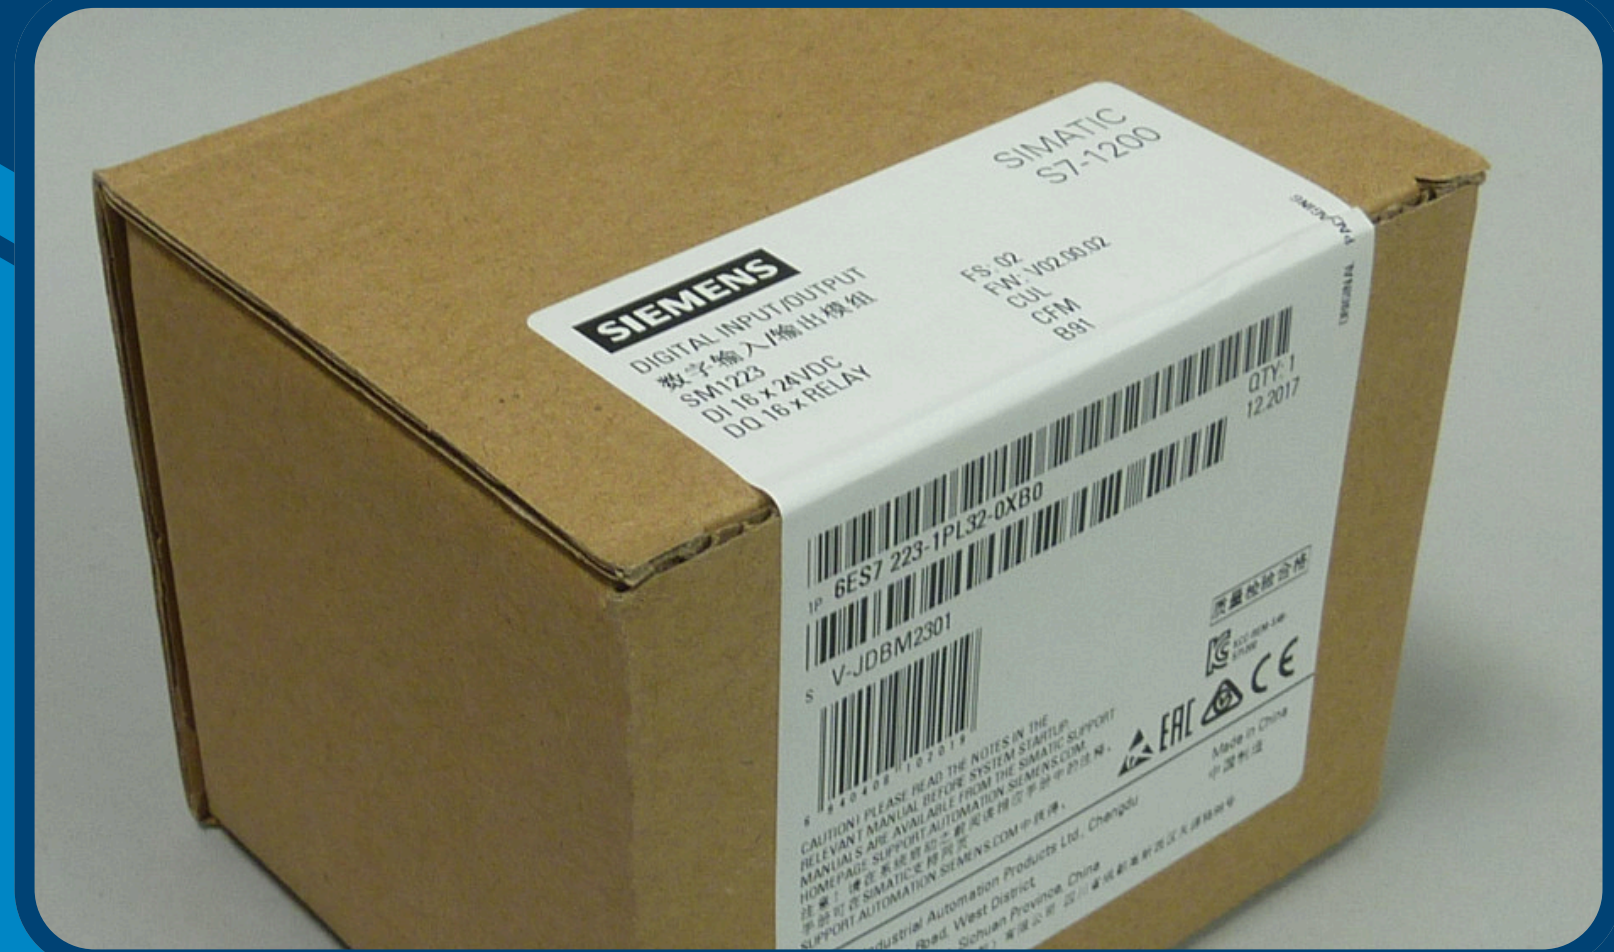

These products come with a full manufacturer's warranty (typically 12 to 24 months), making them an excellent choice for critical applications in industrial plants where reliability is the priority.

Why is it worth it?

- 100% new product
- Original packaging
- Manufacturer warranty
- Highest reliability

NOP

New, open packaging

New products, but coming from opened or slightly damaged packaging.

They are fully functional and unused, and we offer them at more attractive prices. These components are covered by a 12-month warranty, representing a great compromise between price and quality.

This is the solution for those who want to save without sacrificing performance and safety.

Why is it worth it?

- New parts at a lower price
- Confirmed operational efficiency
- 12-month warranty
- Ideal for companies with a limited budget

UNB

Used

We offer used industrial automation components that have passed functional tests and are in full working order.

This is an economical option for pilot projects, prototypes, test benches, or as a quick replacement for a faulty element.

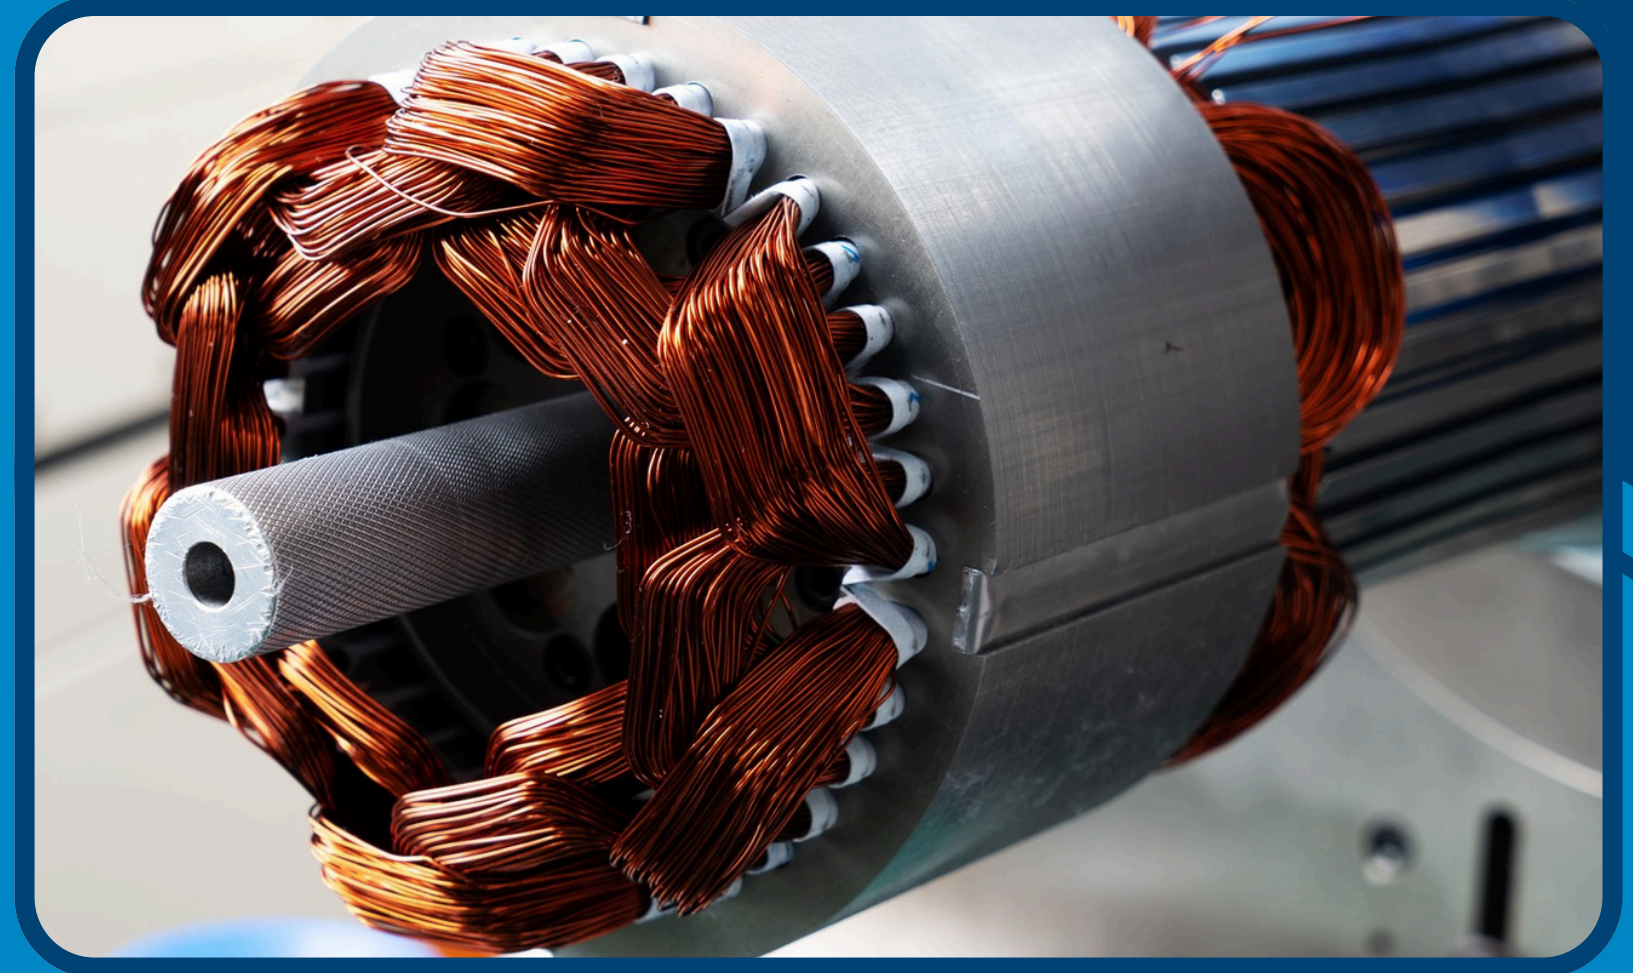

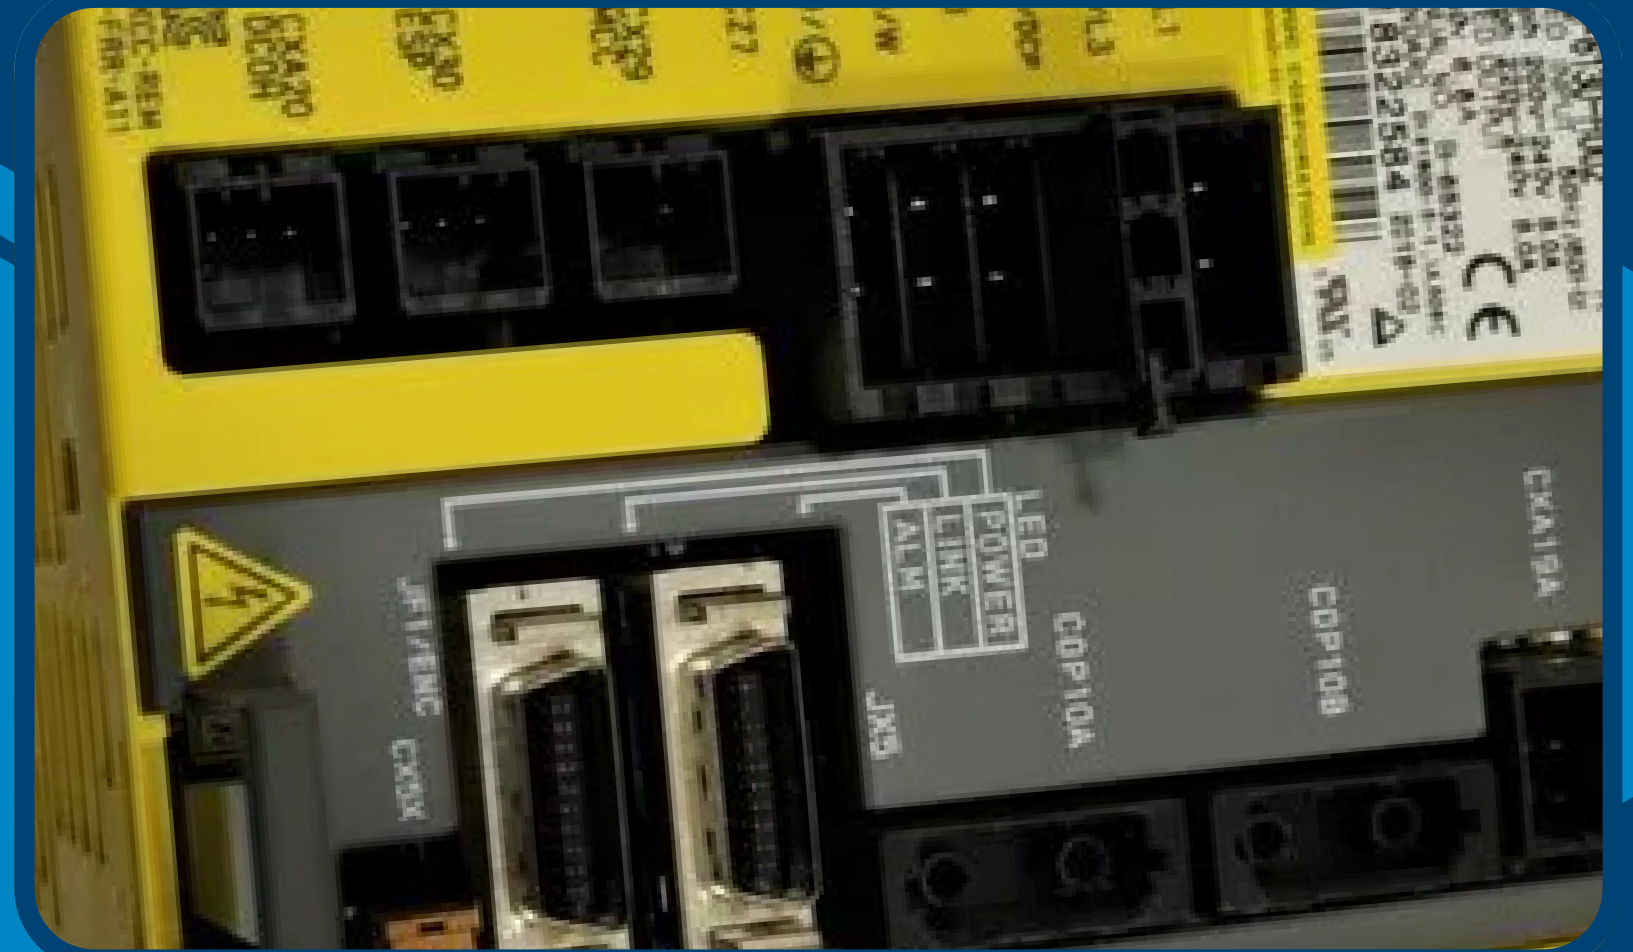

All used parts are covered by a 6-month warranty, providing additional operational security.

Why is it worth it?

- Proven functionality
- Affordable price
- 6-month warranty
- Excellent for prototypes and testing

REG

Refurbished

Parts that have undergone a comprehensive refurbishment process to a near-factory condition.

Automation Trader specialists restore their full functionality, often using original replacement components.

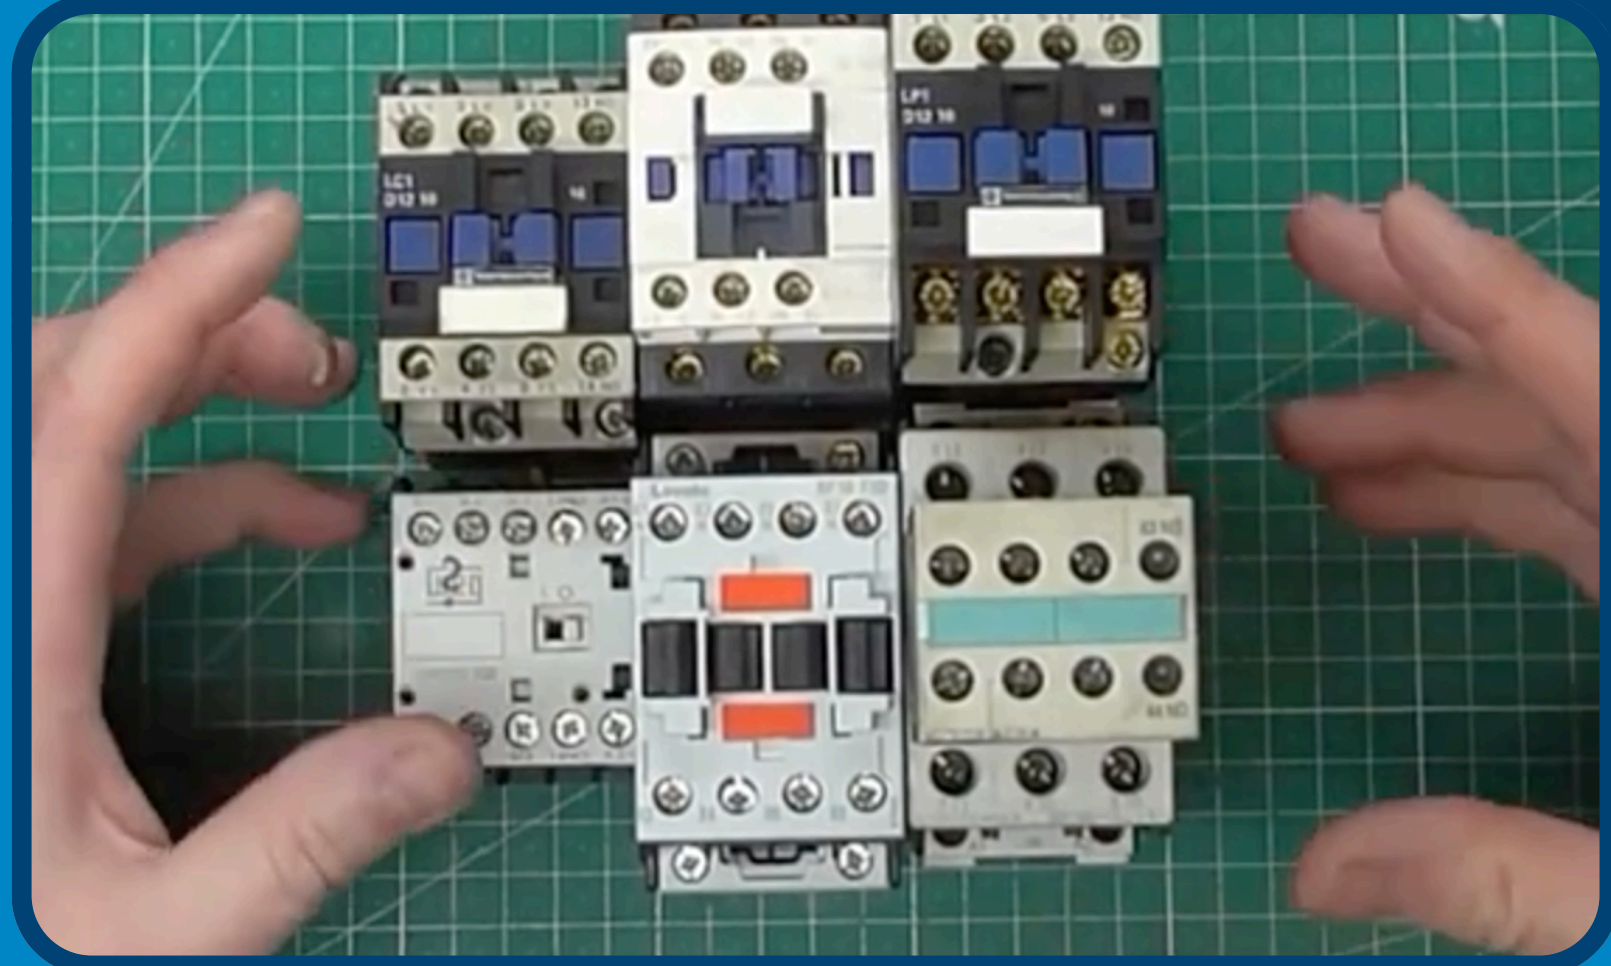

Refurbished products are an excellent alternative to new parts, especially when it comes to rare or discontinued models. Each product is covered by a 12-month warranty.

Why is it worth it?

- Restored to full operational efficiency
- Professional refurbishment
- 12-month warranty
- A reasonable price choice

REP

Repair (quotation)

It is not always necessary to replace a faulty component with a new one.

At Automation Trader, we offer professional cost estimates for repairing industrial automation elements.

We conduct a repair profitability analysis and help customers decide whether servicing or purchasing a new component is the better solution. This is practical technical support and savings in one.

Why is it worth it?

- Professional repair quotation
- Cost assessment vs. purchasing new
- Reliable technical information
- Decision-making support
